Pharmacy Technician Program—Licensure Information

UPDATED: 12/1/2021

Graduation from the Pharmacy Technician program does not guarantee the ability to obtain a Utah state license to practice as a Pharmacy Technician. Licensure is the exclusive right and responsibility of each state. In order to practice as a Pharmacy Technician, students must satisfy individual state requirements, independent of SLCC graduation requirements. It is highly recommended that students consult in advance with the Utah Division of Occupational and Professional Licensing (DOPL), or similar agencies in other states, to find out more about eligibility for licensure. DOPL can be reached at 801-530-6628 or at their website. Pharmacy Technician licensure information is available here.

This document represents a good-faith effort to share requirements for licensure in other states. Licensing regulations are determined by individual State Boards of Pharmacy. Be sure to check publication dates to assure you are viewing the most recent published document or regulation for the state where you are pursuing licensure. In addition, please recognize that there may be additional state requirements for licensure not outlined in this document. In addition to the requirements listed below, applicants may be asked to submit criminal background checks or fingerprinting, pay licensure fees or other certification fees, abide by codes of conduct, or meet other requirements not outlined in this document.

Program Notes
The SLCC Pharmacy Technician program is an ASHP/ACPE accredited, PTCB-recognized Sterile compounding Education/Training program. The program prepares student to sit for one of two Pharmacy Board-approved national certification examinations, the PTCB or the ExCPT.

If you have difficulty finding the licensure requirements for your state, please contact your Program Coordinator, Kristie Fitzgerald, for help.

States and Territories	Does the SLCC Pharmacy Technician program meet the educational requirements for licensure in this state? This list was last updated 12/1/2021. Requirements may have changed since the last update. Please email for more information.
