## Programming or Service Highlights:

- Overall attendance at Orientation *decreased* in the 2015-2016 academic year by 19% from last year, and by 39% since the 2013-2014 academic year.
- Over the last three years, the percentage of students completing a NetConnect Orientation has gradually increased from 66% in 2014, to 68% in the last year, to 70% this year. Despite efforts to incentivize in-person orientations, the majority of students are still gravitating to the benefits of an online orientation.
- For fall semester, CampusConnect Orientations produced the biggest number of enrolled students (83%), and had the highest number of retention rates (76%). Similarly, our efforts to support NetConnect students this year also paid off, yielding the highest enrollment (74%) and retention rates (67%) for this group of students ever.
- Although less students completed orientation in comparison to last year, overall a higher percentage of students enrolled for classes and persisted to spring 2016. This is true for almost every student of color group as well!
- All three types of new student orientation programs received updates, which were designed to create more engaging programming and informational services.

- 72 students completed the Bridge to Success program last winter, and over 100 students have signed up for the Bridge this summer. This year we have worked in tandem with the Math department to include extended math review and readiness lessons, resulting in a more accurate math placement for students in their first-year.
- Advisors continued to present Accuplacer Tips and Tricks Workshops to admitted and continuing students, finding a niche after orientation sessions targeting students who are not able to register for classes due to missing test scores.
- Other First-Year Experience elements continued to be developed this year including welcome-week events, parent and family programming, new first-year cohort-based programs (like Access U, or the West Valley Center Common Intellectual Experience), and early alert academic interventions.

### Assessment Highlights:

- This year we began the Program Review process, and are scheduled to finish the self-report by the beginning of August, and the site visit by the end of September.
