Let me tell you a little secret that most people don't figure out until some years after they graduate: There's a very good chance that your General Education courses will end up being more important to you than your "major" courses. General Education not only exposes you to the realms of knowledge college-educated people ought to possess, but also gives you

opportunities to develop the kinds of communication, critical thinking, quantitative literacy, and collaborative skills that are essential to professional success and civic engagement. I strongly encourage to you make the most of your General Education courses.

Sincerely,
David Hubert
Dean of General and Developmental Education

WHY GENERAL EDUCATION?

- Develop broader perspectives and deeper understandings of your community and the world.
- Find ways to make contributions to your community, nation, and the world.
- Explore a wide variety of topics with an eye toward discovering new interests and uncovering new talents.
- Challenge previously held assumptions about the world and its inhabitants.
- Develop vital workplace skills.
- Find ways to make contributions to your community, the nation, and the world.
- Learn strategies and skills that can be used for life-long learning.
- Explore your career and major interests.
