## **SLCC Bytes into Apple Inc. Hype with iPad Construction Apps**

*SLCC Among First Higher Ed Institution Authorized for Company's Applications*

SLCC's Division of Continuing Education has been approved by Apple Incorporated to launch a series of new titles for the company's new iPad product on Saturday, April 3, 2010.

The college's educational applications are among the first titles available on the iPad.

The initial SLCC iPad apps made available are focused on the construction and energy efficiency industries. These apps will make education and training resources far more readily accessible via Apple's technology.

SLCC is also developing an enrollment management application that will allow students to conveniently access materials they need to get into school and into classes directly from their iPad or iPhone.

The SLCC iPad apps currently available include:

- Contractor License Renewal
- LEED: Construction & Design
- Mechanics' Liens in Utah
- Construction Insurance Issues
- Litigating Construction Cases
- Construction Contracts in Utah
- AIA & Consensus DOCS Contracts
- Advanced LEED Topics
- Construction Law Updates
- International Building Code for Commercial Buildings
- International Resident Code
