

Hello, my name is [REDACTED]. I have a family of seven, my parents, me, my two sisters, and two younger brothers. I am from Salt Lake City. My mom was born in Mexico City, and my dad was born here in Utah. I have been in honors classes since middle school. Now that I'm in high school, I take honors and an AP classes, I also play the cello in the school orchestra. I also wrestle and play rugby.

Why I want to join PACE is to ensure that I can be successful in life. Why I want a college scholarship is so I won't have to worry about student loans causing debt in my future life. I want to help my future family, my community and my country. I want to give back to my community, and help those less fortunate than I am. I want to participate in the college and career exploration activities because it will give me a little insight and experience of how college and real life careers are, and also to learn to how to react to real life situations through these exploration activities.

My goal is to learn as much as I can, to do the best I can, and be successful in life. Careers I'm interested in are engineering, and architecture. My favorite subjects by far are Mathematics and Automotive. These subjects are my favorite because math is fun and easy for me. Automotive because its hands on learning. Why college is important to me is it will make me a more responsible person in life and the careers that I will learn will help me in my future career and have a better chance of getting a better career. Instead of a job, I want to have a career that I can progress and continue to learn.

Thank you for your consideration, [REDACTED].
