Pell, VA

Information current at time of printing.

This program is geared toward students with some previous computer technical skill and knowledge who wish to enhance their skills by learning the increasingly popular Linux operating system. Through the use of hands-on labs and individualized instruction, students will gain an intimate knowledge of Linux and its potential in the business world. Throughout this course, students will learn to install, configure, and troubleshoot Linux servers and the network applications they provide. Topics explored and implemented in the class include the setup and maintenance of many of the most popular network services available for Linux and Unix today.
