UNDERSTANDING THE CE@SLCC CLASS SCHEDULE

Before you begin registering for classes you should understand how to read the CE@SLCC class schedule to be sure you register for the right classes at the right locations. For instructions on how to register download the MySLCC tutorials found on the CE@SLCC website.

The header of the class schedule will indicate which semester the class schedule is for as well as the date that class schedule was created. The class schedule is updated regularly so it is important that you make sure you are using the latest version.

COLUMNS HEADER DESCRIPTIONS

**CRN:** This is the most important part of this table. You will use the CRN number to register for the class. This is a unique class identifier for that particular class. Be sure that when you register you type this number exactly. Failure to do so will result in your being registered in the wrong class.

**Subj:** Short subject code for the class

**Crse:** Course number and section number for the class

**Title (Part Term):** Title of the class. If it is a general education course it will also list the two digit gen ed code in parenthesis. The **Part Term** indicates whether it is a full-term class that lasts the entire semester or if it is a shortened term class that does not last the entire semester.

**Course Type (Start Date-End Date):** This is also a very important field to pay attention to. This will indicate when the first day of class is and the last day of class. The course type is not as important. It basically indicates whether a course is a lecture course in a physical classroom or online. Concurrent enrollment does not offer online classes.

**Days (Campus), Time, Bldg/Rm:** This cell lists the day, time, and classroom number of the course taught as well as the campus location which should be the same as the table header. Days are as follows: M (Monday), T (Tuesday), W (Wednesday), R (Thursday), F (Friday). Time is in military time.

**Instructor (Tuition):** This cell lists the name of the teacher teaching the class and the amount of tuition that you would owe for taking this class. If no teacher is listed that is OK. A teacher will eventually be assigned to the class.

**Cred:** Total number of credits a student will earn for taking the class.
