**Re: Strategy #1, SLCC Pathways**

The 20-21 strategy report contained a brief review of the work and 2 recommendations. I have provided the responses to each recommendation below.

Recommendation	Response
1. Discrete assignments with responsible leads and specific tasks	This is the right next step to evolve Pathways. In addition, more empowerment will be given to Area of Study Leads (Deans) to oversee and develop AoS Community Councils to address the student experiences and needs within AoS. Btw, this aspect bears a striking familiarity with the 'academy model' proposed in 2015 by the Pathways workgroup at that time.
2. Identify specific projects in two categories: Guiding Students and Enhancing Learning	This is also needed at this point. Additionally, we are revising the role of the strategy lead to focus primarily upon the 'horizontal' development of Pathways supports and sustainability models to complement the AoS Community Council dean work
3.
