# BIOSCIENCES

What can I do with this degree?

## AREAS

### RESEARCH AND DEVELOPMENT
- Basic
- Applied
- Quality Control
- Administration
- Grant Writing

### ORGANISMAL BIOLOGY

<table>
<thead>
<tr>
<th>Some Areas of Specialization</th>

</table>

## STRATEGIES

- Learn to set up, operate, maintain laboratory instruments and equipment, and monitor experiments.
- Select courses with laboratory components.
- Seek research experience with professors.
- Gain related experience through part-time jobs, internships, or volunteering.
- Complete a certificate training program, usually one year, to learn specialized laboratory techniques.
- Take a course in grant writing.
- A Bachelor's degree in biology qualifies one for laboratory technician or research assistant positions.
- Earn master's degree for better positions, advancement opportunities, more responsibility and higher pay.
- Obtain Ph.D. to direct research projects and lead research teams.
- Maintain a high grade point average and secure strong faculty recommendations to gain admittance into graduate school.

Seek related experience through coursework, part-time jobs, internships or volunteering.
Conduct research or assist in research including the collection of information and samples of water, soil, plants, animals, etc.
Join student chapters of professional organizations related to your area of interest.
Obtain a Ph.D. for teaching and advanced research and management positions.

### BIOMEDICAL SCIENCES

**Some Areas of Specialization:**

- Biophysics
- Biochemistry
- Cellular and Molecular Biology
- Cytology
- Genetics
- Immunology
- Pathology
- Pharmacology
- Physiology
- Virology

</tbody>
</table>

Plan on attending medical school or other related graduate program.

Maintain an outstanding grade point average, particularly in the sciences.

Secure strong faculty recommendations.

Meet with a pre-health advisor periodically.

Join related student organizations, and demonstrate leadership abilities.

Seek experiences in hospital or healthcare settings through volunteering, shadowing, part-time positions, or internships.
# Healthcare Continued

Develop a back up plan in case medical/graduate school admission is denied. Consider alternative but related careers such as physician assistants. Research all of the various fields within medicine to determine career goals.

## Bioinformatics

<table>
<thead>
<tr>

### COMMUNICATION

**Areas:**
- Technical Writing
- Editing
- Illustrating
- Photography

**Employers:**
- Publishing companies including scientific magazines, professional journals, periodicals, textbooks, and online publishers
- Newspapers
- Educational and scientific software companies
- Zoological and environmental societies
- Medical, dental and veterinary colleges
- Research centers
- Federal government agencies
- Related nonprofit organizations
- Museums

**Strategies:**
- Acquire thorough knowledge of photographic procedures and technology.
- Take specific courses in biological, medical, and ophthalmic photography; courses in illustration and printing are also helpful.
- Develop strong writing skills and command of the English language.
- Take advanced courses in technical writing or journalism classes or consider a minor in either.
- Join professional associations like the National Association of Science Writers.
- Seek related volunteer or paid experiences with student/local publications to increase marketability.
- Obtain an advanced degree in scientific journalism.

### LEGISLATION/LAW

**Areas:**
- Lobbying
- Regulatory Affairs
- Science Policy
- Patent Law
- Environmental Law

**Employers:**
- Federal and state government
- Law firms
- Large corporations

**Strategies:**
- Develop excellent communication and interpersonal skills.
- Maintain current knowledge of industry-specific laws and policies.
- Acquire internships in federal or state government.
- Take courses in history, political science and/or legal studies.
- Acquire a Ph.D. for advanced positions.
- Earn a J.D. degree to practice law.

### BUSINESS/INDUSTRY

**Areas:**
- Technical and Pharmaceutical Sales
- Management
- Consulting
- Marketing

**Employers:**
- Manufacturing companies including:
  - Pharmaceuticals
  - Animal pharmaceuticals
  - Laboratory equipment
  - Medical supplies and prostheses
- Marketing firms
- Consulting firms

**Strategies:**
- Develop excellent communication and interpersonal skills.
- Demonstrate a high energy level.
- Take courses in anatomy, pharmacology, and chemistry.
- Obtain sales experience and/or a business minor.
- Join related student associations and hold leadership positions.
- Consider an MBA or Professional Science Master's for advanced management and consulting opportunities.
GENERAL INFORMATION

- A Bachelor’s degree will qualify one for work as a laboratory assistant, technician, technologist, or research assistant in education, industry, government, museums, parks, and gardens.
- An undergraduate degree can also be used for nontechnical work in writing, illustration, sales, photography, and legislation.
- Master’s degrees allow for more opportunities in research and administration. Some community colleges will hire Master’s level teachers.
- Doctoral degrees are necessary for advanced research and administrative positions, university teaching, and independent research.
- An advanced degree provides the opportunity to specialize in fields of interest.
- The biological sciences are good preparation for a career in healthcare such as medicine, dentistry, and veterinary science, but professional degrees and licenses are also necessary to practice in these fields.
- Learn laboratory procedures and become familiar with equipment.
- Obtain summer, part-time, volunteer, co-op, or internship experience to test the fields of interest and gain valuable experience. Take independent research classes if possible.
- Participate in summer research institutes. Submit research to local poster competitions or research symposiums.
- Develop strong analytical, computer, mathematics, and communications skills.
- Join professional associations and community organizations to stay abreast of current issues in the field and to develop networking contacts.
- Read scientific journals related to your area of interest.
- Maintain a high grade point average to improve chances of graduate and professional school admission.
- Become familiar with the specific entrance exam for graduate or professional schools in your area of interest.
- Secure strong relationships and personal recommendations from professors and/or employers.
- Consider completing a post doctoral experience after graduate school.
- Learn federal, state, and local government job application process. The federal government is the largest employer of biologists.
- Gain experience with grant writing and fundraising techniques. Often research must be funded in this manner.
