## Simply Coding Summer Camp Instructor Summer '21

### **About this Job**

Simply Coding partners with great colleges and universities to provide summer coding camps for youth ages 11+! These camps are designed specifically for that age group giving them a fun enjoyable experience with coding.

The participants will experience coding in its native environment as they use our online lessons to code their own websites, games, and other projects!

As a camp instructor, you'll get to:

- Manage a classroom of youth (crazy and fun)
- Teach coding principles through live demos (these happen in front of the students)
- Teach coding using the lesson examples
- Help the students 1 on 1
- Training provided through Simply Coding
- Paid Position
- Training from the Simply Coding team
- Outlines to follow for each of the camp sessions.

We have organized coding camps for youth since 2014 and love working with college students to run and manage these camps within their community. This is a great experience for your resume, as well as get paid for helping the next generation learn to code.

The potential camps are: JavaScript Game Design, 3D Game Design in JavaScript, Java mini Games and Minecraft Mods in Java, Python Multiplayer Adventures, and many more.

Please send your resume to [seth@simplycoding.org](mailto:seth@simplycoding.org) along with any questions about this opportunity.

### **Goal of Simply Coding**

We create computer science curriculum to teach youth how to code their own Websites, Games, and Apps. Their projects are then uploaded live on the web to their own GitHub accounts creating the beginning of their online digital portfolio.

### **PAY RATE**

Based on location and student enrollment ~\$15 / hour
