## **WFEngineering Job Description**

### **Job Title: Mechanical Drafter**

#### **WFEngineering Company Description:**

WFEngineering is a company that specializes in the manufacturing of custom industrial machinery and technology for the Fiberglass Manufacturing Industry. We do work all around the world and pride ourselves on having the best engineers and machinists to design and manufacture the highest quality products possible.

#### **Job Description:**

We are looking for a smart mechanical drafter to work directly with our machine shop and engineering team to design new products, update old documents and catch design flaws before drawings are released for manufacturing or construction.

#### **Desired Virtues and Skill:**

- Hard worker and self-starter
- Honest and patient
- Proficient in AutoCAD/Solidworks (1-year minimum exp)
- Knowledgeable of machining practices (turning, milling, welding, etc.)
- Knowledgeable of P&ID drawings and systems

\*Contact us with a copy of your resume and a drawing that shows your drafting knowledge\*
