
WHAT IS CONCURRENT ENROLLMENT?

A Concurrent Enrollment class is a college level class from SLCC that students take at their high school. A select few Concurrent Enrollment courses are also offered on SLCC campuses each semester. Concurrent Enrollment students earn college and high school credit at the same time. They register for the classes at the high school and their credit is recorded on a permanent college transcript as well as their high school transcript.

WHY TAKE CONCURRENT ENROLLMENT?

Students get a head start on college courses. Duplication of classes is reduced, shortening the time necessary to earn a college degree.

Students can develop study habits and critical thinking skills essential to college success.

Courses facilitate transition from high school to college.

Parents and students save money.

New challenges are added to the senior year.

Undecided students can determine if college is right for them.

WHICH COLLEGES AND UNIVERSITIES ACCEPT SLCC CONCURRENT ENROLLMENT CREDIT?

All Concurrent Enrollment courses will count toward a degree at Salt Lake Community Col-

lege as major, general education or elective credit. Colleges and universities in the Utah System of Higher Education, BYU, the University of Phoenix and Westminster College also accept Concurrent Enrollment credit as if the classes were taken on campus. The university determines the application of transfer credit. There is no guarantee that Concurrent Enrollment classes will satisfy general education or major requirements at other institutions. It is recommended that students transferring SLCC credit seek academic advising at the college or university they plan to attend. Students who complete an Associate of Science (AS) or Associate of Arts (AA) degree at SLCC may transfer that degree to any college or university in the state of Utah. If students choose to attend out of state, they will want to contact that institution to best determine how the degree will be received. An associate degree satisfies the basic lower division general education requirements of a bachelor's degree. Students entering a university after completing an associate degree may be required to take specific prerequisite courses before registering for upper division classes in their majors.

STEP AHEAD.

WHO IS ELIGIBLE TO TAKE SLCC CONCURRENT ENROLLMENT?

High school seniors and juniors are eligible to register for concurrent enrollment courses. A few courses are available to sophomores, who are academically and socially ready, through an appeal process. Our experience suggests that a student with a minimum of a “B” grade point average and the motivation to work hard can succeed in SLCC course work. This program is designed to meet the needs of most college-bound students who are seeking an academically challenging course of study.

SAME CREDIT, A FRACTION OF THE COST!

Because the state provides funds for the cost of instruction and facilities, Concurrent Enrollment classes at high schools are offered to students for a reduced tuition payment. Concurrent Enrollment students also pay a one-time, non-refundable admission application fee.

Students who choose to come to the College campus during high school as Early Enrollment Students must pay full tuition and fees. (A standard 3-credit hour class such as English would cost between \$400 and \$500 at SLCC.) Full tuition is required because the College must support all on-campus costs for instruction and facilities.

HOW DIFFICULT ARE CONCURRENT ENROLLMENT COURSES?

The curriculum is the same as the course taught on campus. Compared to high school classes, Concurrent Enrollment classes may go into greater depth, require more work and offer greater challenge. They may make considerable demands on a student’s ability to conceptualize, understand hidden meanings and draw conclusions from reading and research. These are the same challenges that a student accepts when enrolling in a college or university. Students taking these courses should be prepared for rigorous academic work. Parents should understand that their student could experience more stringent grading standards than those to which they may be accustomed.

WHAT SLCC CONCURRENT ENROLLMENT COURSES ARE OFFERED AT MY HIGH SCHOOL?

Concurrent Enrollment offerings vary from school to school. Take that first step and check with your high school to find out which Concurrent Enrollment courses are available at your school, or visit the Salt Lake Community College Concurrent Enrollment website at www.slcc.edu/concurrentenrollment and click on “Courses at High Schools”.

WHO TEACHES CONCURRENT ENROLLMENT CLASSES AT THE HIGH SCHOOLS?

High school instructors who meet SLCC hiring requirements for adjunct faculty teach the Concurrent Enrollment courses. College faculty and full-time liaisons closely supervise and work with course instructors. Concurrent Enrollment courses are a part of the high school instructor’s normal teaching load. The courses taught at high schools are the same as the courses taught on SLCC campuses. Course curriculum, text books, assignments, exams and grading requirements are comparable.

The College is fully committed to policies of equal employment and nondiscrimination and works to prevent any form of exclusion from participation in, denial of benefits of, or subject any individual to discrimination, harassment, or prejudicial treatment on the basis of race, color, national origin, age, sex, sexual orientation, gender identity, genetic information, disability, religion, protected veteran status, expression of political or personal beliefs outside of the workplace, or any other status protected under applicable federal, state, or local law. If you need special accommodations to attend SLCC, please call (801)957-4659.
