

Dear Middle School CCA Teachers,

We at Crossroads AHEC hope that your classes are off to a great start this term. We are reaching out to offer you an excellent learning opportunity for your classroom.

THE PURPOSE OF CROSSROADS

We guide young students in their understanding, consideration, and preparation to become a health care professional. Your College and Career Awareness classes are an excellent place for this to begin. We understand the challenge of preparing and teaching this information, besides all the other areas you cover. Crossroads is a wonderful resource to help you and your students learn about careers in the medical field.

CLASS PRESENTATIONS WE OFFER

Crossroads AHEC will come to your school and give a classroom presentation about the many medical professions that exist today. We address the myths and misunderstandings teens often have about these jobs. Your classes will enjoy lots of interaction through presentations that may include team games, a pig heart dissection, and how to keep your heart healthy. Our presentation helps students explore a possible fit for their future in over 300 different health care careers. There is a minimal fee of \$40 for each class.

OUR PRESENTERS

Rochelle Lambertsen and/or Brendan Schnopp will be attending your class(es). Both presenters are non-traditional students with Bachelor's Degrees, have returned to school, are currently studying for the MCAT and applying to Medical School in 2022. They each have worked in a variety of healthcare professions and look forward to encouraging your students to pursue careers in the health sciences.

We are looking forward in helping your students learn, evaluate, and possibly pursue a career in the medical field. Feel free to contact us to book presentations for your classes or any other ways we can help you.
