HEALTHCARE

Join us as we hear from health care professionals and learn about the many careers in the industry

PROGRAM BENEFITS

Earn \$15/hr
Free Lunch
Health Career Related Field Trips
College Course Preparation

ABOUT US!

Embark on a transformative journey with our Pre-health Summer Program, where learning meets adventure! One of the program's standout features is our captivating weekly field trips to renowned healthcare facilities and colleges. Picture yourself exploring the Intermountain Health Simulation Lab in Salt Lake City, where our students dive into the world of emergency response and hands-on trauma treatment. But that's not all – our comprehensive college readiness classes, spanning six weeks, cover Math, English, and Science curriculum. Geared towards preparing students for courses like English 1010, Math 1010, and Biology 1610 at Utah's Higher education institutions, these classes provide a solid academic foundation. The program doesn't stop at classrooms and labs; each day ends with 30-minute presentations from diverse health professionals – pharmacy, occupational therapy, medical assisting, nursing, dental, and clinical engineering. Expand your horizons and discover the multitude of exciting healthcare careers that await you!

ELIGIBILITY

Priority will be given to rising juniors and seniors interested in a career in healthcare, first-generation students, or students that qualify for free or reduced lunch.
