1.0 OVERVIEW AND GENERAL INFORMATION

1.1 WELCOME

Welcome to the Salt Lake Community College (SLCC) Dental Hygiene Program. By entering this program, you have chosen a dynamic and challenging field of study that can bring you very rewarding opportunities and experiences. The purpose of this handbook is to give students quick access to information regarding policies and procedures that regulate the activities and expectations of the SLCC Dental Hygiene Program.

This handbook will be used in conjunction with the [Student Affairs Code of Student Rights and Responsibilities](#) and the [SLCC Course Catalog](#). Specific information you must know about college-wide policies and procedures is contained in these publications; hence, it is essential to carefully review the information included therein. Additions and corrections may be added to this handbook as deemed necessary by program administration with due notice to students.

Refer to the [SLCC Institutional Syllabus](#) available on Canvas for the most up to date information regarding general information.

1.2 SALT LAKE COMMUNITY COLLEGE OVERVIEW

VISION

Salt Lake Community College will be a model for inclusive and transformative education, strengthening the communities we serve through the success of our students.

MISSION

Salt Lake Community College is your community college. We engage and support students in educational pathways leading to successful transfer and meaningful employment.

VALUES

We don't just state our values; we live them through dedicated, collective effort. Our values ground our future endeavors and help us realize our mission of being an open-access, comprehensive community college committed to our students' transfer education and workforce needs.

Collaboration - We believe we're better when we work together.

Community - We partner with our community in the transformative, public good of educating students.

Inclusivity - We seek to cultivate an environment of respect and empathy, advanced by diverse cultures and perspectives.

Learning – We learn as a college by building outstanding educational experiences for students and by supporting faculty and staff in their professional development.

Innovation – We value fresh thinking and encourage the energy of new ideas and initiatives.

Integrity – We do the right things for the right reasons.

Trust – We build trust by working together in good faith and goodwill to fulfill the College’s mission.

SALT LAKE COMMUNITY COLLEGE STUDENT LEARNING OUTCOMES

- Students develop quantitative literacies necessary for their chosen field of study.
- Students think critically and creatively.
- Students develop civic literacy and the capacity to be community-engaged learners who act in mutually beneficial ways with community partners.
- Students develop the knowledge and skills to work with others in a professional and constructive manner.
- Students develop information literacy.
- Students develop computer literacy.
- Students develop the attitudes and skills for lifelong wellness.

SALT LAKE COMMUNITY COLLEGE EQUAL OPPORTUNITY

It is the policy of Salt Lake Community College to comply with all federal, state, and local authorities requiring nondiscrimination, including, but not limited to Title VI and VII of the Civil Rights Act of 1964, Executive Order No. 11246, 45 CFR Part 90, the Civil Rights Restoration Act of 1987, Title IX of the Education Amendments of 1972, The Americans with Disabilities Act of 1990 (ADA), the Age Discrimination Act of 1975, Genetic Information Nondiscrimination Act of 2008, and Utah’s Executive Order, issued December 13, 2006.

The College is fully committed to policies of equal employment and nondiscrimination and works to prevent any form of exclusion from participation in, denial of benefits of, or subject any individual to discrimination, harassment, or prejudicial treatment on the basis of race, color, national origin, age, sex, sexual orientation, gender identity, genetic information, disability, religion, protected veteran status, expression of political or personal beliefs outside of the workplace, or any other status protected under applicable federal, state, or local law.

1.3 STUDENT SERVICES

The [Jordan Student Center \(JSTC\)](#) on the Jordan Campus offers a variety of services including college cashier, health center, bookstore, fitness room, and limited food service. Student Services on the Jordan Campus is located at the JSTC information desk in the first-floor commons. To learn more about available services, please refer to the [Current Students](#) website.

FITNESS AND RECREATIONAL FACILITIES

The [Lifetime Activities Center](#) on the Redwood Campus is the primary recreational facility for SLCC. Additional fitness centers can be found on Jordan and South campus. The [Recreation](#) webpage describes these student services and activities in detail.

LIBRARY

The library system has print books and periodical subscription, access to electronic databases and reference titles (which include full text articles and indexing/abstracting services), e-books, e-journals, online video resources, popular movies, telecourse videos, and more. Patrons may access the library's online catalog and full text database services through any computer on campus or off-campus via the Internet.

LIBRARY LOCATIONS AND HOURS

The SLCC library system currently has four physical branch locations. For further information, such as hours, locations, and how to contact each branch, view [All Hours & Locations](#).

LIBRARY CARD

Your library ID is your student "S" number. Your library card is your SLCC OneCard. OneCard ID Centers are located at the Information Desk in the JSTC and, Student Center at Redwood, and in room W175 at South City. Call (801) 957-4022 for more information.

LIBRARY STAFF

Need assistance? Please contact our [library staff](#). Library staff can assist with e-Portfolio, research, and reference questions; inter-library and inter-campus loans; and training to assist in using the library's resources and accessing the Internet. They are happy to assist you in any way that they can. They are in the Jordan Health Science (JHS) building, room 235, 801-957-6202.

ADVISING AND COUNSELING SUPPORT SERVICES

The purpose of Academic Advising at Salt Lake Community College is to help current students identify their educational goals, advise students about their program of study, and to create

academic plans for successful completion. Counseling Services at the Center for Health & Counseling are here to help students deal with obstacles and challenges so they can achieve success with their academic and personal goals while at SLCC.

CENTER FOR HEALTH AND COUNSELING

If you find yourself struggling with your mental or physical health this semester, the [Center for Health & Counseling](#) (CHC) provides convenient and affordable health care, mental health counseling, massage therapy services and healthy lifestyle programs right here on campus. CHC is staffed by experienced, licensed professionals who are attuned to the needs of college students. These services are low cost, completely confidential, and available to provide support for students enrolled in any class at the college.

The CHC is located at the Taylorsville/Redwood, South City, and Jordan campuses. For CHC hours, information about CHC services, or to book an appointment please call 801-957-4268 or visit slcc.edu/chc.

If you wish to talk with someone immediately, you may start a free chat or call with a licensed crisis counselor, 24/7 through the [SafeUT App](#) or calling 1 (800)273-8255.

VETERANS SERVICES:

[Veterans Services](#) provides comprehensive assistance and support to all SLCC servicemembers, veterans and dependents as you complete your educational goals. These services are available to provide support for students enrolled in any class at the college.

ACADEMIC ADVISING:

[Academic Advising](#) helps students plan, explore, make decisions, access resources and evaluate their academic and career goals. These services are available to provide support for students enrolled in any class at the college.

To make an appointment with Academic Advising and a variety of other Student Support Services, you can use MySuccess.

- To access MySuccess, log in to your MySLCC portal.
- Select the Advising Tab.
- Click “Login to MySuccess” under the find your advisor section.
- Your homepage will have your Primary Academic Advisor listed at the top (along with a list of services below, and a search bar to find other staff and services).
- Click on your Primary Advisor’s name to see their availability and to book an appointment.
- Check your Bruinmail for an email confirmation.

LEARNING SUPPORT AND TUTORING SERVICES

The following services provide support for SLCC students enrolled in any class at the College. All resources are provided free-of-charge. Ask your instructor about discipline-specific learning support and tutoring services.

- [Tutoring](#): index of all tutoring resources.
- [STEM Learning Resources](#): provides free tutoring and assistance in math and science courses at five campus locations.
- [Student Writing & Reading Center](#): provides in-person and online feedback on all writing and reading assignments.
- [Library Services](#): provides research help, print and online resources, computers and study space.
- [ePortfolio Lab](#): provides drop-in assistance for all ePortfolio questions.
- [eLearning Support](#): provides support for navigating online and hybrid classes.
- [Business Resource and Innovation Center](#): provides tutors and a study space for students in Business and CSIS courses. Located in BB 226 on Taylorsville-Redwood Campus.
- [Academic Calendar](#): provides important dates for the academic year.
- [Bookstore](#): find course materials and SLCC merchandise as well as information on store hours

FINANCIAL AID

Information about financial aid provided through SLCC and other venues can be found in the current SLCC College Catalogue. If a student needs more in-depth information/assistance, they should contact the [Financial Aid Office](#) in the Student Center at the Redwood/Taylorsville Campus or on the Jordan Campus in the new Student Center next to the Advising Offices.

You may access information about your aid application and financial awards by logging in to: MySLCC → Student tab → Financial Aid

SLCC TODAY BLOG

Interested in campus news and tutorials? Check out [SLCC Today](#).

1.4 STUDENT SUPPORT SERVICES

GENDER & SEXUALITY STUDENT RESOURCE CENTER (GSSRC)

The SLCC Gender & Sexuality Student Resource Center (GSSRC) celebrates students through education, advocacy, engagement, and belonging while working holistically with students as they

navigate gender- and sexuality-based experiences, needs, and barriers throughout their educational journey.

The GSSRC is located at the SLCC South City Campus in SCM 1-140. Visit us Mondays-Thursdays, 9am – 5pm, and remotely on Fridays, 9am – 5pm.

To receive support or get involved, contact us: GSSRC@slcc.edu; slcc.edu/GSSRC; 801.957.3143; Instagram & Facebook (@SLCCGSSRC).

ACCESSIBILITY & DISABILITY SERVICES (ADS) (FORMALLY THE DRC)

SLCC values inclusive learning environments and strives to make all aspects of the College accessible to our students. If you have an accessibility issue or disability and believe you need accommodations to improve access to learning materials or the learning environment, please contact Accessibility & Disability Services:

Phone: 801-957-4659

Email: drc@slcc.edu

Website: www.slcc.edu/drc.

ADS advisors are trained to assist with pregnancy related accommodations. We strongly recommend any student who is pregnant or becomes pregnant while in the program notify the ADS. This will allow preventative measures to be taken, safety process in place to protect the student and the unborn child and allow for accommodations if they become necessary.

Due to risk of fetal exposure to radiation and chemicals while in the Dental Hygiene Program it is strongly recommended that all pregnant students work closely with the ADS regardless of whether accommodations are necessary.

Watch the following video to learn more about the ADS: [ADS Accessibility](#).

TITLE IX OFFICE

Title IX of the Educational Amendments of 1972 prohibits discrimination based on sex in any educational institution that receives federal funding. Salt Lake Community College does not tolerate sex discrimination of any kind including sexual misconduct, sexual harassment, relationship/sexual violence and stalking. If you have questions or concerns regarding your rights or responsibilities, or if you would like to file a Title IX complaint please contact: [Director EEO/Title IX](#)

Students may also use the [Online Reporting Form](#). Students may also report incidents to a SLCC faculty or staff member, who are required by law to notify the Title IX Coordinator. If a student wishes to keep the information confidential, the student may speak with staff members of the Center for Health and Counseling, 801-957-4268. For more information about Title IX, go to the following site: [What Does Title IX Mean For You?](#)

REPORTING INCIDENTS OF HATE OR BIAS

Salt Lake Community College (SLCC) is committed to fostering a safe and welcoming campus for all students, faculty, and staff; in turn, it is the responsibility of each person at SLCC to join in creating an environment in which others can thrive without fear of hate or bias.

[This form](#) may be used to make the College aware of any incidents of hate or bias.

FOOD, CHILDCARE, AND CRISIS RESOURCES

There are several resources available for students at SLCC:

- For information about SLCC's food pantry for students, please visit the [Bruin Pantry](#).
- For childcare assistance, please visit [Child and Family Care Services](#).
- For information on other crisis resources, please visit [Crisis Circumstances](#).
- For information about campus safety, please visit [#SLCCSAFE](#).

STUDENT ENGAGEMENT, EXPERIENCE, AND ACHIEVEMENT (SEEA)

The Student Engagement, Experience, and Achievement (SEEA) office is committed to supporting, advocating and celebrating the multicultural experiences of all our students. We empower students to explore and embrace their intersectional identities as a fundamental step for achieving success. For more information about SEEA or to get involved, please visit us at www.slcc.edu/diversity

THE DREAM CENTER

The [SLCC Dream Center](#) works holistically with undocumented students (with or without DACA) and members of mixed-status families to achieve their personal and academic goals. If your immigration status presents significant obstacles to your success at the College, whether that is engaging in particular activities, fulfilling specific course criteria, or impacting your academic career in any other way, confidential arrangements may be requested from the Dream Center. Please know that arrangements made with the Dream Center will not jeopardize your student status, access to scholarships, or any other part of your residence. To learn more, contact the Dream Center by emailing dreamcenter@slcc.edu, or on Instagram @slccdreamcenter

1.5 SECURITY AND PARKING

JORDAN CAMPUS POLICE AND EMERGENCY NUMBERS:

Emergencies: Dial [911](#)

Jordan Campus Police: 801-957-3800 (Non-emergency)

Animal Control: 801-840-4000

PARKING

SLCC's [Parking Services](#) regulates the sale of digital parking permits and enforcement of parking rules, including patrolling parking lots, and administering fines.

Students need a [digital parking permit](#) to park on any SLCC campus, except Meadowbrook and West Valley Center. Student parking is marked by yellow lines. Designated student parking is shown on the [Jordan Campus Parking Map](#). Please make yourself aware of [SLCC parking regulations](#).

****Disclaimer: SLCC is authorized to regulate parking and traffic and to issue citations on all SLCC campuses by Utah State Code 53B-3-103, 106. Rules and regulations may change at the discretion of SLCC administration. The college is not responsible for theft or damage to vehicles parked on campus. Overnight parking is prohibited, and vehicles left overnight will be impounded.*

1.6 STUDENT RIGHTS AND RESPONSIBILITIES

[The Student Code of Rights and Responsibilities](#) governs the behavior of our student body and is for student use. Its purpose is to state the specific authority and responsibility of the College in maintaining social discipline, outline the process for a legitimate grievance, and establish the proper procedures to be followed to ensure “due process,” which protects accused students from unfair imposition of penalties and sanctions. The Code outlines the specific rights which students are guaranteed, and the responsibilities students have as a community member. It also specifically outlines the procedures for hearing cases of student misconduct, grievances, and academic dishonesty issues.

All students are expected to be aware of and follow the [Code of Student Rights and Responsibilities](#).

2.0 OVERVIEW OF PROFESSION

A dental hygienist is a licensed oral health professional who promotes optimum oral health by providing education and therapeutic services to adults and children. A career in Dental Hygiene provides entry into a variety of professional opportunities including clinician, educator, administrator, public health worker, government worker, researcher, or international health care provider.

CAREER OPPORTUNITIES

Dental hygienists may secure employment in a variety of settings, including private dental offices and clinics, schools, care facilities, hospitals, community public health facilities, and other government agencies. Due to the unique nature of the profession, dental hygienists commonly enjoy a flexible work schedule ideal for balancing career and lifestyle needs.

2.1 ADHA CODE OF ETHICS

Professional behavior is a fundamental element of becoming a competent oral health care professional. As individuals, health care professional's personal values may vary, *but as members of their professions, they are expected to share and uphold those values that characterize the practice of healing and medicine.* The assumption and expectation are that the student will behave in a professional manner in all dealings with patients, peers, instructors, and others throughout their tenure in the program.

As defined in our clinical setting, professionalism includes the quality of a student's professional relationships, patient communication and care, professional appearance, professional responsibilities, problem solving ability, performance management, infection control and best practice procedures. These qualities of the student's behavior will be evaluated in the same manner as clinical performance.

Our professional behavior is also based on the American Dental Hygiene Association (ADHA) [*Code of Ethics for Dental Hygienists*](#). All students are required to be members of this association and, as such, are expected to be compliant with this code throughout their tenure in the program.

2.2 ESSENTIAL FUNCTIONS FOR CAREER SUCCESS

Essential skills are non-academic criteria used in the admission, promotion, and graduation of students. They include industry specific standards and published discipline specific skills critical for the safe and reasonable practice of Dental Hygiene. They also protect qualified persons with disabling conditions against discrimination.

Essential skills are concrete statements of the minimum physical, sensory/motor, communication, behavioral/social, mental/emotional, and environmental requirements for

normal and safe professional function. They are intended to inform the prospective student/professional of the attributes, characteristics, and abilities essential to dental hygiene practice.

Professional competency is the summation of many cognitive, affective, and psychomotor skills. The College has a moral and ethical responsibility to select, educate, and certify competent and non-maleficent students and practitioners. Patient health and safety is the sole benchmark against which we measure all performance requirements, including the essential skills addressed in this document.

COMMUNICATION - VERBAL, AUDITORY AND WRITTEN

Communication is the “effective transmission or interchange of facts, attitudes, opinions or thoughts through words, gestures or other means”. “[Communication] skill is critical because, tact, ingenuity judgment and cultural sensitivity are taxed to the fullest in an attempt to obtain accurate and complete information from” patients, parents, guardians or caregivers. “Maintenance of complete records for every aspect of care provided for each patient is a key aspect of dental hygiene practice” (Wilkins’).

Communication skills must be sufficient to permit the student to transmit, deliver, receive, and interpret verbal and non-verbal communication to and from the patient, instructor, peer students and staff. English is the language used within the Dental Hygiene program. In order to communicate with patients and other professionals, the student must:

- Demonstrate English language communication skills sufficient for interaction with others in verbal and written form (communication is clear and understandable to others).

OBSERVATION AND SENSORY SKILLS

Students are required to visually assess, recognize, and interpret variations or signs of disease in normal hard and soft anatomic structures. They must be able to recognize and react to signs of a medical emergency.

Visual acuity must be sufficient and adequate to allow the student to:

- Possess appropriate depth perception with vision from a distance of 18 inches with or without corrective lenses.
- Differentiate between shades of gray on radiographs to determine quality and identify anatomy.
- Differentiate between color variations in tissues to distinguish between normal and abnormal.
- Read control panels, technique charts, and other pertinent materials for patient care and professional practice.
- Demonstrate adequate depth perception in the instrumentation of tooth structures.

Hearing abilities must be sufficient to allow the student to communicate with and evaluate patients.

Auditory processing must be sufficient and adequate to allow students to:

- Evaluate stethoscope sounds in the monitoring of blood pressure and respiratory dysfunctions.
- Hear normal speaking level sounds and various voice ranges.
- Hear a range of pitches to allow for recognizing auditory alarms and telephone ringers, and other sounds of various pitches.

PHYSICAL QUALIFICATIONS, MOTOR FUNCTION, AND MOTOR FUNCTION

Students must have the physical ability to tolerate the ongoing use of approved personal protective devices including, but not limited to, face masks, face shields, safety eyewear, surgical gloves, and laboratory coats. Students are also required to carry out Occupational Safety and Health Administration (OSHA) and Organization for Safety and Asepsis Procedures (OSAP) including proper hand hygiene with soap and water and proper use of an alcohol-based formulation. Students must be able to safely handle and apply relevant cleaners and chemicals.

Students must be able to perform all functions and tasks required of a dental hygienist. A person with certain musculoskeletal conditions may have difficulty performing the daily activities required by the profession of dental hygiene. These include, but are not limited to, degenerative conditions or injuries to the neck, back, shoulder, elbow, wrist and/or hands. Examples: herniated or bulging disks, chronic rotator cuff symptoms, and carpal tunnel. It is strongly recommended that individuals with any of these conditions be evaluated by their physician prior to pursuing the dental hygiene degree.

Motor functions must be sufficient to permit the student to be able to:

- Manipulate dental equipment and dental hygiene instruments with eye-hand coordination with both hands.
- Manipulate dental radiographic equipment unassisted.
- Use upper body strength to assist patients in emergency situations (perform CPR).
- Lift 25 pounds (strength to assist patient in transferring into a dental chair from a wheelchair)
- Sit/stand unassisted for long periods of times at a level to provide safe and effective patient care.
- Demonstrate fine and gross motor skills necessary to provide safe and effective dental hygiene instrumentation and the administration of local anesthesia.
- Write clearly and neatly with pen.
- Use a computer keyboard and mouse.
- Demonstrate tactile abilities to allow for physical assessment using palpation and exploring and working strokes with dental hygiene instruments.
- Sustain repetitive push, pull and rotation movements of hands at the wrist.

CONCEPTUAL/ANALYTICAL REASONING

Perform treatment modalities using concepts and judgments that are the standards of care for the Dental Hygiene profession.

Students must be able to demonstrate critical thinking skills deemed appropriate for the academic level and discipline content.

A student must be able to:

- Comprehend and integrate knowledge from didactic courses and professional literature into the assessment, planning, implementation, and evaluation of dental hygiene treatment.
- Demonstrate long and short-term memory.

BEHAVIORAL AND SOCIAL SKILLS

Respect and maintain FERPA/HIPAA Privacy and confidential personal information guidelines. Demonstrate respect and caring for all patients. Demonstrate sensitive responses to patients in clinical settings. Interact with peers, patients, staff and faculty in an emotionally stable, professional and ethical manner. Respect diversity of cultures among clinical patients (i.e., patient condition, periodontal health etc.), college personnel and peers. Demonstrate team approach in carrying out responsibilities in all settings whether in clinical rotation, classroom, or offsite rotation.

A student must be able to:

- Monitor his/her emotions. Manage strong emotions (such as grief and anger) in a professional manner in a high stress environment.
- Perform multiple responsibilities concurrently.
- Adapt to a changing environment/stress and deal with the unexpected (such as in a crisis situation).
- Provide treatment and services to all patients/clients without discrimination.
- Treat others with respect.
- Work effectively as a team member with dentists, faculty, staff, rotation site personnel and other dental and dental hygiene students.

2.3 PROFESSIONAL ORGANIZATIONS

Students are required to join the following professional organizations during their tenure as SLCC Dental Hygiene students:

- [SADHA - Student American Dental Hygiene Association](#)

The SLCC SADHA Chapter is run by students within the program, under faculty supervision.

- [UDHA - Utah Dental Hygienists' Association](#)

2.4 LICENSURE

The SLCC Dental Hygiene program meets the educational requirement to apply for licensure as a Dental Hygienist in the state of Utah. It is important to note that graduation from the Dental Hygiene program does not guarantee the ability to obtain a Utah state license to practice as a Dental Hygienist. Licensure is the exclusive right and responsibility of each state. In order to practice as a Dental Hygienist, students must satisfy individual state requirements, independent of SLCC graduation requirements.

It is highly recommended that students consult in advance with the Utah Division of Occupational and Professional Licensing (DOPL), or similar agencies in other states, to find out more about eligibility for licensure. DOPL can be reached at 801-530-6628 or at their website <https://dopl.utah.gov/>

For those who plan to work as a Dental Hygienist in another state, students are strongly advised to research licensing requirements for that state. One suggested website for researching state licensure requirements is [License Finder sponsored by the U.S. Department of Labor](#). If you have difficulty finding the licensure requirements for your state, please contact your academic advisor or SLCC's state authorization coordinator for help.

2.5 CERTIFICATIONS

Candidates for licensure must be graduates of an accredited dental hygiene program, have successfully completed both the CDCA-WREB-CITA in Local Anesthesia and clinical Dental Hygiene and the written National Board Dental Hygiene Examination (NBDHE). Candidates must also complete the application process from the Department of Professional Licensing (DOPL), hold a current CPR certification, and submit all board scores and official college transcripts.

Graduates are eligible to apply to the CDCA-WREB-CITA exams and National Board upon program administration verification. Please see their websites for more information:

- [National Board Dental Hygiene Examination \(NBDHE\)](#)
 - Dental Hygiene Written National Board (NBDHE)
- [Western Regional Exams\(CDCA-WREB-CITA\):](#)
 - Local Anesthesia - Written Exam
 - Local Anesthesia - Simulated Clinical Exam
 - Objective Structured Clinical Exam (OSCE)
 - Dental Hygiene - Simulated Clinical Exam

3.0 DENTAL HYGIENE PROGRAM OVERVIEW

The SLCC Dental Hygiene Program offers an Associate of Applied Science (AAS) degree which prepares graduates to practice entry level dental hygiene.

Dental hygienists provide preventive and therapeutic health care services including oral health assessment & education, dental radiographs, pit & fissure sealants, fluoride treatments, oral prophylaxis, local anesthesia, advanced periodontal therapy, in addition to public dental health services.

Upon administrative approval, second year SLCC dental hygiene students are eligible to take examinations required for licensure, including the written [National Board Dental Hygiene Examination](#) (NBDHE) and state or regional clinical examinations, administered by the [CDCA-WREB-CITA](#).

3.1 ADMINISTRATION, FULL TIME FACULTY, AND STAFF

The Dental Hygiene program is administered by a Division Associate Dean, Program Coordinator, Clinic Manager, and program support. The faculty includes full-time faculty, adjunct Supervising Dentists, and adjunct Registered Dental Hygienists (RDH) who teach in classes, labs and in clinic. All dentists and hygienists are board certified, licensed in the State of Utah, and current on their professional development, CPR certification, and continuing education.

FACULTY AND FULL TIME STAFF

Renee Mendenhall, MBA, RDH
Program Coordinator

Staci Stout, MS, BSDH, RDH
First Year Coordinator

Kristen Hall, BS, RDH
Second Year Coordinator

Wendee M Shorter
Clinic Manager

DIVISION OF ALLIED HEALTH

Associate Dean: Dr. Tashelle Wright

Administrative Assistant:

Division Office: 801-957-6216 or 801-957-6009

SCHOOL OF HEALTH SCIENCES

Dean: Dr. Robert Pettitt PhD, FACSM, ATC, CSCS

Administrative Assistant:

Contact Number: 801-957-6322

3.2 PROGRAM MISSION, GOALS, AND PHILOSOPHY

PROGRAM MISSION STATEMENT AND GOALS

To provide quality education to students regardless of gender, race, culture, or age, who will be prepared academically, technically, and ethically to meet the challenges of providing dental hygiene care to a broad range of ethnically, socioeconomically and chronologically diverse populations.

EDUCATION

- Provide appropriate didactic and clinical instruction through an interactive, competency-based curriculum that is reviewed regularly and modified as necessary to address the dynamics of a constantly changing profession.
- Provide didactic and clinical instruction in a positive learning environment that leads to appropriate social and ethical development as a health care professional.

PATIENT CARE

- Systematically collect, analyze, and accurately record baseline data on general, oral, and psychosocial health status using methods consistent with medico-legal principles. Using this data, determine a dental hygiene diagnosis at a level consistent with the student's education and scope of practice.
- Provide educational and clinical services in the support of optimal dental health to diverse populations that may include people who are medically compromised, mentally or physically challenged, or socially or culturally disadvantaged.
- Provide excellent ethical, professional dental hygiene treatment based upon competencies within didactic and clinical instruction.

PROFESSIONALISM

- Encourage student and faculty participation in and support of professional service organizations that promote the service mission of the program, the College, and the dental hygiene profession.
- Recognize opportunities for continued professional growth and apply these experiences and skills to achieve an ever-increasing level of professionalism.

PROFESSIONAL DEVELOPMENT

- Provide opportunities for faculty development and recognition.
- Encourage faculty and student participation in pursuit of continuing education toward becoming life-long learners.

CIVIC ENGAGEMENT

- Foster opportunities for faculty and student involvement in service activities that are consistent with personal development goals and that promote dentistry as an integral component in the overall health and welfare of the community.
- Develop civic literacy and become community-engaged learners who act in mutually beneficial ways with community partners.
- Use community engaged learning to involve students in activities that serve local needs while developing their academic skills and increasing their subject matter knowledge and commitment to their community.

PROGRAM PHILOSOPHY

As Dental Hygiene faculty, we believe in upholding the Mission Statement of Salt Lake Community College to provide an atmosphere for learning by offering a comprehensive curriculum leading to an Associate of Applied Science Degree in Dental Hygiene. We are committed to providing quality education to students regardless of gender, race, culture, or age, who will be prepared academically, technically, and ethically to meet the challenges of providing dental hygiene care to a broad range of ethnically, socioeconomically, and chronologically diverse populations.

The student is responsible for maximizing the learning experiences during formal education. With this responsibility comes the realization that Dental Hygiene is a dynamic discipline, requiring the development of skills that can facilitate continued learning after the completion of the initial, formal education.

The instructors provide support, direction, and creative learning experiences, and, along with the learner, are responsible for determining the best method to assist students in acquiring knowledge and skills to become competent professionals. Learning is augmented by the instructor, whose roles include advisor, facilitator, mentor, and role model.

3.3 PROGRAM OUTCOMES

Graduates are expected to meet the following dental hygiene competencies for the entry-level dental hygienist.

CORE COMPETENCIES

Dental health professionals require interrelated health knowledge in order to deliver ethical and equitable person-centered care. They are members of interprofessional and intraprofessional teams, emphasizing evidence-based practice, quality assurance and informatics. The dental workforce is comprised of dental assistants, dental hygienists, dental laboratory technicians, dentists, and all advanced and future dental practitioners.

All dental health care providers collaborate with one another and related professionals to deliver continuing oral care and support patients by addressing health care issues affecting society. The allied dental professional must have a broad-based education and experience in order to demonstrate professional and ethical behavior. This includes employing effective communication and interpersonal skills, using emerging trends and technologies, applying critical thinking skills and addressing health care issues.

To enhance personal and professional development, including opportunities for career expansion, dental professionals' participation in continuing education and lifelong learning is vital. This document addresses the Core and Discipline-specific Competencies for the allied dental professions (dental assisting, dental hygiene, and dental laboratory technology) that provide characteristics of conduct found among all dental professionals.

Graphic Representation of Competency Structure

THE CORE COMPETENCIES INCLUDE:

- Professional Knowledge: 1) Professionalism, 2) Safety, 3) Critical Thinking and 4) Scientific Inquiry and Research
- Health Promotion and Disease Prevention: 1) Health Education and Community Connection and 2) Advocacy
- Professional Development and Practice: 1) Professional Growth, 2) Business Practices and 3) Leadership

The Core and Discipline-specific Competencies provide a framework for the development of an entry-level curriculum as part of the educational process for the new practitioner. This framework embraces the intent of high-quality and culturally aware care for all persons.

ALLIED DENTAL CORE COMPETENCIES FOR PROFESSIONAL KNOWLEDGE

PROFESSIONALISM

- Apply professional values and ethics in all endeavors.
- Adhere to accreditation standards and federal, state and local laws and regulations.
- Promote quality assurance practices based on accepted standards of care.
- Demonstrate interpersonal skills to effectively communicate and collaborate with professionals and patients across socioeconomic and cultural backgrounds.

SAFETY

- Comply with local, state and federal regulations concerning infection control protocols for blood-borne and respiratory pathogens, other infectious diseases and hazardous materials.
- Follow manufacturers' recommendations related to materials and equipment used in practice.
- Establish and enforce mechanisms to ensure the management of emergencies.
- Use security guidelines and compliance training to create and maintain a safe, ecofriendly and sustainable practice compatible with emerging trends.
- Ensure a humanistic approach to care.
- Uphold a respectful and emotionally safe environment for patients and practitioners.

CRITICAL THINKING

- Demonstrate critical and analytical reasoning to identify and develop comprehensive oral health care solutions and protocols.
- Apply individual and population risk factors, social determinants of health and scientific research to promote improved health and enhanced quality of life.

SCIENTIFIC INQUIRY AND RESEARCH

- Support research activities and develop research skills.
- Use evidence-based decision-making to evaluate and implement health care strategies aligned with emerging trends to achieve high-quality, cost-effective and humanistic care.
- Integrate accepted scientific theories and research into educational, preventive and therapeutic oral health services. Health Promotion and Disease Prevention

HEALTH EDUCATION AND COMMUNITY CONNECTION

- Endorse health literacy and disease prevention.
- Communicate and provide health education and oral self-care to diverse populations.
- Facilitate learning platforms for communities of interest by providing health education through collaboration with dental and other professionals.
- Promote the values of the dental profession through service-based activities.
- Evaluate outcomes for activities supporting health and wellness of individuals and communities.

ADVOCACY

- Promote an ethical and equitable patient care and practice environment by demonstrating inclusion of diverse beliefs and values.
- Uphold civic and social engagement through active involvement in professional affiliations to advance oral health. Professional Development and Practice

PROFESSIONAL GROWTH

- Commit to lifelong learning for professional and career opportunities in a variety of roles and settings.
- Engage in research, education, industry involvement, technological and professional developments and/or advanced degrees.
- Demonstrate self-awareness through reflective assessment for continued improvement.

BUSINESS PRACTICES

- Facilitate referrals to and consultations with relevant health care providers and other professionals to promote equitable and optimal patient care.
- Promote economic growth and sustainability by meeting practice goals.
- Create and maintain comprehensive, timely and accurate records.
- Protect privacy, confidentiality and security of the patients and the practice by complying with legislation, practice standards, ethics and organizational policies.

LEADERSHIP

- Develop and use effective strategies to facilitate change.
- Inspire and network with others to nurture collegial affiliations.
- Solicit and provide constructive feedback to promote professional growth of self.

DISCIPLINE-SPECIFIC COMPETENCIES: DENTAL HYGIENE

The dental hygiene competencies are the continuation of the allied dental core competencies, and both should be viewed as a single framework for this discipline. Dental hygienists are oral health professionals who specialize in the identification, prevention and management of oral diseases. Dental hygienists provide evidence-based, person-centered care through assessment, diagnosis, planning, implementation, evaluation and documentation. They practice in collaboration with dental and other professionals in a variety of settings to recognize the oral-systemic connection for improvement of oral health, general health and well-being of individuals, communities and populations.

DH. 1 ESSENTIAL KNOWLEDGE

DH. 1.1 Apply knowledge of the following sciences during the dental hygiene process of care:

- Microbiology
- Human anatomy and physiology

- Human cellular biology
- Chemistry
- Biochemistry
- Immunology and pathology
- Nutrition
- Pharmacokinetics

DH. 1.2 Apply knowledge of the following behavioral sciences during the dental hygiene process of care:

- Sociology
- Psychology
- Interpersonal communication

DH. 2 PERSON-CENTERED CARE

DH. 2.1 Assessment

DH. 2.1.1 Accurately collect and document a comprehensive medical, dental, social health history and diagnostic data.

DH. 2.1.2 Critically analyze all collected data.

DH. 2.1.3 Identify predisposing, etiologic, environmental, and social risk factors for person-centered care.

DH. 2.2 Dental Hygiene Diagnosis

DH. 2.2.1 Analyze comprehensive medical, dental, and social health history.

DH. 2.2.2 Integrate observational and diagnostic data as part of the dental hygiene diagnosis. DH.

DH. 2.2.3 Use predisposing, etiologic, environmental, and social risk factors for person-centered care.

DH. 2.3 Planning DH.

DH. 2.3.1 Use the patient's assessment to establish an optimal and realistic, person-centered dental hygiene care plan through mutual communication.

DH. 2.3.2 Use all aspects of the dental hygiene diagnosis in combination with the person's values, beliefs and preferences to develop a dental hygiene care plan through shared decision making.

DH. 2.4 Implementation

DH. 2.4.1 Obtain informed consent based on the agreed-upon treatment plan.

DH. 2.4.2 Execute individualized treatment based on the patient's dental hygiene diagnosis.

DH. 2.4.3 Integrate educational, preventive, and therapeutic services to provide comprehensive person-centered care.

DH. 2.4.4 Use specialized skills and evidenced-based technology to promote dental and periodontal health.

DH. 2.4.5 Continuously re-evaluate for modifications to achieve desired outcomes.

DH. 2.5 Evaluation and Documentation

DH. 2.5.1 Evaluate the effectiveness of completed services.

DH. 2.5.2 Analyze treatment outcomes of the dental hygiene process of care to determine improved health and modifications.

DH. 2.5.3 Modify dental hygiene care plans as necessary to meet goals of patient and clinician.

DH. 2.5.4 Identify necessary referrals for success of the treatment outcomes, including intraprofessional, and interprofessional health care providers, supporting professions and patient advocates.

DH. 2.5.5 Accurately document assessment findings and data, dental hygiene diagnosis and care plan, implementation, outcome evaluation and any communication between professionals and patient and anyone else in the circle of care.

ADEA, (2023). ADEA competencies for entry into the allied dental professions, (As approved by the 2023 ADEA House of Delegates).

3.4 PROGRAM CURRICULUM

COURSE SCHEDULE: AAS DENTAL HYGIENE

FIRST YEAR

Semester: Fall	
Course	Cr/Hr
DH 1050 - Dental Radiology	2
DH 1060 - Dental Radiology Lab	1
DH 1100 - Dental Hygiene Theory I	3
DH 1110 - Clinical Dental Hygiene I	2
DH 1330 - Head and Neck Anatomy	2
DH 1340 - Dental Anatomy	1
DH 1350 - Dental Embryology/ Histology	1
TOTAL	12

Semester: Spring	
Course	Cr/Hr
DH 1140 - Dental Materials	1
DH 1150 - Dental Materials Lab	1
DH 1400 - Dental Hygiene Theory II	3
DH 1410 - Clinical Dental Hygiene II	3
DH 1540 - Pharmacology	3
DH 1640 - Compromised Patient Special Needs	2
TOTAL	13

SECOND YEAR

Semester: Fall	
Course	Cr/Hr
DH 2050 - General and Oral Pathology	3
DH 2200 - Dental Hygiene Theory III	3
DH 2210 - Clinical Dental Hygiene III	4
DH 2340 - Local Anesthesia	2
DH 2341 - Local Anesthesia Lab	1
DH 2450 - Periodontology	2
TOTAL	15

Semester: Spring	
Course	Cr/Hr
DH 2220 - Community Dental Health	3
DH 2600 - Dental Hygiene Theory IV	3
DH 2610 - Clinical Dental Hygiene IV	5
DH 2800 - Practice Management	2
TOTAL	13

3.5 ACCREDITATION

The SLCC Dental Hygiene Program is currently accredited without reporting requirements by the Commission on Dental Accreditation (CODA) of the American Dental Association (ADA).

American Dental Association
Commission on Dental Accreditation
401 North Michigan Avenue
Suite 3300
Chicago, Illinois 60611-4250
800-232-6108

3.6 PROGRAM ADMISSIONS

GENERAL ADMISSIONS REQUIREMENTS

1. Be admitted to SLCC as a matriculated student. (See: <http://www.slcc.edu/apply/index.aspx>)
 - 1.1. High School Graduate or equivalent
 - 1.2. For transfer credit, submit OFFICIAL, SEALED transcripts for ALL colleges and universities where prerequisite course work has been completed. Transcripts should be sent to:
 - 1.2.1. SLCC Office of the Registrar and Academic Records, 4600 South Redwood Road, P.O. Box 30808, Salt Lake City, UT 84130-0808
 - OR
 - 1.2.2. Sent electronically to TransferEvaluation@slcc.edu
- 1.3. Also, a request to have an OFFICIAL evaluation of student's transcript(s) must be submitted to the SLCC Transfer Evaluation Office.
 - 1.3.1. The form is located at: <http://www.slcc.edu/transcriptevaluation/>.
 - 1.3.2. This process may take 4-6 weeks and must be completed before a student's application will be considered.
2. Complete SLCC Placement exam, or submit current SAT/ACT test scores, if MATH and ENGL course work have not been transferred to SLCC (required before you are able to register for classes that have MATH and ENGL courses as prerequisites). See: www.slcc.edu/testing.

SELECTIVE ADMISSIONS APPLICATION REQUIREMENTS

The SLCC Dental Hygiene Program is a selective admissions program. Applications will only be considered from students who have met all pre-requisite and admissions requirements. These requirements are outlined in detail at:

<http://www.slcc.edu/dentalhygiene/admissions.aspx>

ADDITIONAL REQUIREMENTS AND DOCUMENTATION IN COMPLIO

Students admitted into the program will be required to purchase a COMPLIO (American DataBank) Compliance Package through <https://login.complio.com> and submit the following in COMPLIO:

- Proof of all required program vaccinations and/or proof of immunity. (See below.)
- Proof of successful completion of CPR certificate from a recognized certification body such as American Heart Association or Red Cross. The CPR certificate must be 2 year

BLS provide, or BLS with AED. Certification must not expire while in program, if expiration date is set during program student will need to renew certification before it expires to ensure there is not lapse in certification. If you have questions regarding if a potential certification course will meet these requirements please reach out to the Associate Dean.

- Purchase and complete background check through SLCC's authorized vendor (American DataBank). Failure to pass background check may result in program dismissal or may limit the ability for licensure.
- Upon notification, purchase and complete drug screening through SLCC's authorized vendor. Failure to pass drug screen may result in program dismissal. Students are not to purchase the drug screen package until notified.
- Students are fiscally responsible for complying with requirements specific to working in clinical settings. The following costs are estimates only for planning. Actual cost and frequency are determined by vendors and specific clinical facilities. Estimated costs include:
 - Background check - \$30
 - Drug Screen Package - \$35
 - Compliance Package - \$15/yr
 - Immunizations - Cost varies considerably based on insurance coverage, past vaccinations, and personal immunity.

It is the responsibility of the student to contact the Utah State dental licensing board (Division of Professional Licensing—DOPL) and seek advice regarding eligibility for licensure/certification and requirements needed to progress in this profession if the criminal background check discloses issues of concern.

DRUG SCREEN POLICY & RESPONSIBILITY

The Salt Lake Community College Health Sciences Programs conform to the common health profession requirement for drug screening. Both enrollment in the program and subsequent placement at clinical sites is contingent upon presentation of a negative drug screen. This program supports and enforces a zero (0) tolerance drug policy.

Drug screens are completed prior to starting the program, and students are also subject to random drug screens during their time within the program. A student has 72-hours to complete the drug screen once instructed to do so. Exceptions to the 72-hour period will not be allowed based on personal needs including work obligations. The drug screen must be conducted as per program requirements including, but not limited to, timing and location. Failure to meet these requirements will result in the student's dismissal from the program.

A student taking prescription medication that may show up in the drug screen must provide the lab a copy of the physician's script or a prescription label prior to the screening. A student taking prescription medication may be contacted by the testing facility's physician for verification and confirmation of the prescribed substance. Likewise, the student may be asked to meet with the Associate Dean to discuss testing results.

A student who refuses a drug screen, or whose test results are positive for controlled substances, will be dropped from the program unless documentation justifying the positive result is provided by the testing facility to the Division Office.

A negative dilute drug screen may occur by adding a substance to the urine or drinking large amounts of liquid. This may occur unintentionally or intentionally. If a student receives a negative dilute report, the student is responsible for the cost of additional testing. A second drug screen must occur within one week of the first. If a student receives a second negative dilute or failed screen, the student will be dropped from the program.

To avoid this, eat a good meal two (2) to four (4) hours before taking the drug screen and limit the intake of fluid. Excessive fluid intake could result in a diluted drug screen test result.

CRIMINAL BACKGROUND CHECK

****This information was provided to you at the time you applied to the program. This is just a reminder regarding information that may have appeared on your criminal background check: You assume the risk if your criminal background check is not clear. If you do not pass the background check, you may not be able to complete clinical assignments that are a part of the program you are in. This may result in dismissal from the program or an inability to take advantage of certain clinical sites. If an issue arises you may be asked to withdraw from the program, and it may be after the tuition refund deadline has passed. The clinical placement agencies make the final determination about accepting students for clinical placement. It is strongly recommended that if you know of any incidences that may impact you related to the past, that you take measures to have criminal offenses (felonies and or misdemeanors) expunged or sealed from your record if possible. Please consult with either your program coordinator or the appropriate associate dean.*

Completing a criminal background check is a requirement for all students entering the Dental Hygiene Program. Potential students must understand that certain negative results on this test may preclude them from entering the program, being involved in clinical rotations and/or being eligible for licensure in the profession. The following guidelines must be adhered to:

- I understand that all dental hygiene students are required to submit a criminal background check.
- I understand that a criminal background check may be arranged for by the program but will be paid for by the student.
- I understand that clinical placement agencies may require a criminal background check for clinical student placements. I am aware that the SLCC Dental Hygiene Program will disclose

contents of the criminal background check to the clinical agency. The clinical agency may decline to have students placed at their facility.

- I understand that the clinical placement facility makes the final determination about accepting students for placement in their facility.
- If I cannot be placed successfully in a clinical setting to meet course requirements, I understand that I may not be able to successfully complete clinical courses.
- I must accurately describe and disclose to the Associate Dean case findings as noted on the criminal background record, if any.
- I understand that students with a history of a misdemeanor or felony may not be allowed in clinical settings and/or eligible for licensure/employment as a dental hygienist.
- I understand that it is my responsibility to contact the licensing agency to disclose findings and seek advice regarding eligibility for licensure and requirements needed to progress in a dental hygiene career or profession, if the criminal background check discloses issues of concern or subsequent to my acceptance/graduation from the SLCC Dental Hygiene Program I am convicted of any criminal behavior.
- I understand that the decision about eligibility for Dental Hygiene licensure is determined by the Utah Department of Professional Licensure. I have been made aware of the Dental Hygiene Practice Act Rules and Regulations. The location of the document is found at www.dopl.utah.gov for further reference.
- I understand that upon completion of the Dental Hygiene Program, CDCA-WREB-CITA (and/or other testing agencies) may require a national background check prior to sitting for licensure exams.

CPR/BLS PROVIDER CERTIFICATION

Upon acceptance into the Dental Hygiene program and prior to any patient treatment responsibilities, all students must obtain and maintain throughout the duration of the program the appropriate Basic Life Support/Cardiopulmonary Resuscitation (BLS/CPR) certification (fees apply). Certification must be a two-year BLS with AED or BLS/provider certification. It must be obtained through a recognized certification body such as Red Cross or American Heart Association (AHA) All BLS/CPR certification is dependent on review and approval by the division office. **Your CPR certification must be kept current throughout the program.**

15-1805 3-card

A Basic Life Support (BLS) Health Care Provider Certification Card is required to participate in the program. Every student must have a current BLS certification for the entirety of the program.

Documentation of initial and updated BLS/CPR certification must be **uploaded into Complio**. Students must monitor their own status regarding this requirement and be sure they re-certify prior to the expiration of their current BLS/CPR card. Failure to do so will result in their being unable to treat patients in the SLCC clinic, or be placed on clinical rotation, which will stop their progress in the program.

IMMUNIZATIONS AND TITERS

Additionally, upon acceptance into the program, the following immunizations are required of each student (*fees will apply*). Students must upload official documentation to the Complio website. Failure to complete and upload documentation for all immunization/ immunization series prior to the commencement of clinical experiences will result in the student being unable to treat patients in clinic which will stop their progress in the program. Exemptions for vaccinations are available for students who are unable or wish not to receive vaccination. Unvaccinated students (such as those who opt to use the exemption form) may not be eligible to be placed or completed a clinical requirement necessary for graduation.

ANNUAL INFLUENZA VACCINATION

Annual Influenza vaccination is generally offered between September and February. A current influenza vaccination is required for practicum placements and as such the student must be sure they are current for placement.

TUBERCULOSIS SKIN OR BLOOD TEST: REQUIRED ANNUALLY

Proof of negative 2-step PPD, QuantiFERON TB Gold test or T-SPOT.TB annually.

If positive, or if you have had a positive test in the past, you must submit a negative chest x- ray. This requirement also includes international students who have had the BCG immunization. X-ray results are good for three years.

If you choose to do a PPD please know that the PPD is a 2-step test, the 1st step must be done no sooner than the dates specified in Complio and the 2nd step is required within 1 - 3 weeks after the 1st step is read. Results are good for 1 year.

Please note that a 2 step PPD test requires 4 office visits:

- 1) Test is administered,
- 2) Test is read,
- 3) 2nd test is administered,
- 4) Test is read.

The QuantiFERON or T-Spot are blood tests and require one visit with lab results uploaded to the Complio website.

TETANUS, DIPHTHERIA AND PERTUSSIS (TDAP) BOOSTER:

The Tdap booster is good for 10 years, at which point it must be renewed.

MEASLES, MUMPS, RUBELLA (MMR)

You must provide proof of a positive titer (blood draw) on all three (measles, mumps, and rubella). If any of the titers are negative (non-reactive) or equivocal you will need to reinitiate the shot series according to health care provider recommendations and provide proof of that series and a repeat titer.

VARICELLA (CHICKEN POX)

Proof of two doses **OR** a positive titer (blood draw). Stating you had the disease is not acceptable. Varicella immunizations are expensive. If you had the disease it is recommended to start with a less expensive titer first for proof of immunity before starting the immunizations.

NOTE: Since both the MMR and the Varicella vaccines are attenuated live virus vaccine, any females who are pregnant or attempting to become pregnant should consult with your physician prior to receiving these vaccines. If a physician recommends that you postpone receiving the vaccine you will need to provide a written statement by your physician to Complio stating as such as well as a time frame in which you would be able to compete this requirement.

HEPATITIS B

You must provide proof of a HEP B Surface Anti-body Titer HBsAB that proves immunity (Blood test). If the titer is negative (Non-reactive), you will need to repeat the HEB B vaccination series. It is recommended that you receive the Heplisav 2-dose series, if possible, as this allows for a shorter time frame to complete the repeat series and titer. The series of shots can take up to 6 months so please plan ahead so this does not delay or jeopardize your admissions and clinical placement.

HEPATITIS A VACCINATION SERIES (OPTIONAL):

Highly recommended but not required. Proof of a two-dose series or a positive titer. If you start the series, you must complete it.

COVID- 19 VACCINATION SERIES

Highly recommended but not required. Proof of completed FDA approved vaccination series.

Immunizations requirements may change after students have entered the program due to current health issues and or clinical internship requirements. The student must comply at the student's own expense. **Failure to do so will result in dismissal from the program.**

3.7 REQUIRED TEXTBOOKS, FEES AND SUPPLIES

The SLCC Dental Hygiene Program is a professional program requiring training utilizing specialized equipment and supplies. The maintenance and update of this equipment is paramount to meet accreditation standards and provide students with a state-of-the-art clinic in

which to learn and practice their dental hygiene skills. Students are assessed fees in specific clinics and labs in each applicable semester.

Due to the unique nature of the profession of Dental Hygiene, there are specialized instruments required for the practice of Dental Hygiene. The Dental Hygiene student is required to purchase the SLCC sanctioned instrument kit for use during the two-year Dental Hygiene Program. This instrument kit is evaluated annually for appropriate updates and revisions by the faculty of the Dental Hygiene Department to reflect current trends in the Dental Hygiene profession and to build optimal student competency in skill level. These instruments are the property and responsibility of the student during their two-year program and after graduation.

Required textbooks will be discussed in each course syllabus.

3.8 PROGRAM ADVISORY COMMITTEE

The Program Advisory Committee exists to assist in the direction of the program. The Committee is composed of community leaders and students. A student representative will be chosen by each cohort to serve on the Committee during their time in the program. The Committee generally meets virtually three times per year. The student's role will be to bring the concerns and recommendations of students to the committee.

3.9 CANVAS LEARNING MANAGEMENT SYSTEM

Canvas Learning Management Software is the primary software used within SLCC classes and the Dental Hygiene Program. Although other software or programs may be used to supplement course material, grading and online course discussions will be run exclusively through the Canvas platform.

Postings on Canvas will be considered relative to the class and any information shared in Canvas is not to be shared outside of class including on other social media sources.

Access to Canvas requires each student utilize a unique and secure log in. In addition, Lockdown Respondus monitor may be utilized for secure and safe test-taking.

4.0 PROGRAM ADMINISTRATION AND ACADEMIC POLICIES

4.1 POLICIES AND PROCEDURES

A. STUDENT CONDUCT

The *Student Affairs Code of Student Rights and Responsibilities* governs the behavior of the student body. As members of the academic community, students enjoy the privileges and share the obligations of the larger community of which the College is a part. With membership in this community come obligations, which are consistent with goals of personal and academic excellence. These obligations include acceptance of a code of civilized behavior as defined by the *Student Affairs Code of Student Rights and Responsibilities*. Each student is held responsible for fully understanding and complying with its policies.

In addition, Dental Hygiene students have the added responsibility to safeguard the health and welfare of their patients. Dental Hygiene students are held to a higher level of accountability including scrupulous ethical and professional behavior in all settings. Depending on the nature and severity of the infraction, Dental Hygiene students who commit a violation of the SLCC *Student Affairs Code of Student Rights and Responsibilities* or a breach of professional behavior as defined by the program may be summarily dismissed from the program.

For program specific student conduct expectations see section J.

B. STUDENT HEALTH

STUDENT INSURANCE

In alignment with the Affordable Healthcare Act, students are responsible for their own medical insurance coverage. Inadequate personal healthcare insurance coverage may affect clinical placements due to specific clinical affiliate requirements.

Information about available plans can be found at <https://www.healthcare.gov>.

SLCC WORKERS COMPENSATION AND INJURY REPORTING

Workers' Compensation is a no-fault insurance system that pays medical expenses and helps offset lost wages for employees who experience work-related injuries or illnesses. Volunteers and students participating in a clinical may also receive medical benefits for injuries or illnesses that occur during volunteer or clinical assignments. Lost wage benefits are not available to volunteers or students.

Please refer to the [SLCC Workers' Compensation Claim Report](#)

Report injuries **immediately** to the Clinical Instructor and Clinic Manager; The Dental Hygiene Program will assist you in following protocol and reporting procedures to SLCC Risk Management by the next business day.

STUDENT ILLNESS POLICY

Communicable diseases vary in their virulence, duration, mode of infection and effects. In order to protect students, patients, and staff:

- Students with known communicable disease that are transferred by air or contact and are of short duration may not attend clinical courses.
- A written note from a physician is required if a student must be absent from a didactic or clinical course due to illness.
- Students are required to inform the Clinical Coordinator and Clinical Educator as per the Attendance Policy.

Students with illnesses of long duration must present a written diagnosis. The student may be able to continue in clinical with direction regarding patient care from the student's physician, or the student may be asked or elect to withdraw from the clinical course until the illness is resolved. Additional options may be discussed at the discretion of the Clinical Coordinator and Program Coordinator. All information is confidential and not released unless mandated by law. In the case of an illness of long duration it is strongly recommended that the student also contact Accessibility and Disability Services.

C. OCCUPATIONAL EXPOSURE/EMERGENCIES

Students entering the Dental Hygiene profession must understand that many procedures performed by a dental hygienist expose him/her to bloodborne pathogens requiring strict adherence to Organization for Safety Asepsis and Prevention (OSAP) infection control protocols and Standard Precautions as outlined in detail in the [*SLCC Bloodborne Pathogens Policy*](#) and training module presented by the SLCC Dental Hygiene Program. Students will be **required** on an annual basis to complete and test at an acceptable level in this training module before being allowed to work in the clinical setting.

I. PREGNANCY CONSIDERATIONS

Due to the fact that pregnancy requires more rigorous radiation protection and other safety protocols, students who are, become, or reasonably suspect the possibility of pregnancy during their tenure in the program are strongly recommended to notify Accessibility and Disability Services to ensure that proper steps are taken to protect the mother and child from occupational exposure risks related to coursework.

II. DISEASE PRECAUTIONS AND PREVENTION

Medical histories and examination often cannot and do not identify all patients infected with a HIV, Hepatitis B or other bloodborne pathogens. Disease can be transmitted through exposure to body fluids, secretions, and excretions. The potential risk that health care workers may be exposed to blood and body fluids emphasizes the need to consider all patients as potentially infected with transmittable pathogens. All health care workers must adhere to infection control precautions to minimize the risk of exposure.

To minimize the risk of transmission of bloodborne pathogens, Standard Precautions should be used in the care of all patients.

CDC Blood Borne Information can be viewed online at [Occupational Safety and Health Bloodborne Infectious Diseases webpage](#). They include but are not limited to the following:

- Health-care workers should routinely use appropriate barrier precautions to prevent skin and mucous membrane exposure when contact with blood or other body fluids of any patient is anticipated.
- Gloves should be worn for touching blood and body fluids, mucous membranes, or non-intact skin of all patients, for handling items or surfaces soiled with blood or body fluids, and for performing venipuncture and other vascular access procedures.
- Gloves should be changed after contact with each patient.
- Appropriate masks and protective eyewear or face shields should be worn during procedures that are likely to generate aerosols, droplets of blood or other body fluids to prevent exposure of mucous membranes of the mouth, nose, and eyes.
- Gowns or aprons should be worn during procedures that are likely to generate splashes of blood or other body fluids.
- Hands and other skin surfaces should be washed immediately and thoroughly if contaminated with blood or other body fluids. Hands should be washed or hand- sanitized immediately after gloves are removed.
- All health-care workers should take precautions to prevent injuries caused by needles, scalpels, and other sharp instruments or devices during procedures; when cleaning used instruments; during disposal of used needles; and when handling sharp instruments after procedures. To prevent needle stick injuries, needles should not be recapped, purposely bent or broken by hand, removed from disposable syringes, or otherwise manipulated by hand. After they are used, disposable syringes and needles, scalpel blades, and other sharp items must be placed in puncture-resistant containers for disposal; the puncture-resistant containers should be located as close as practical to the use area. Needles used to administer local anesthesia must be made safe using a one-handed recapping technique. Needles and anesthetic carpules used in administration of local anesthesia must be placed in a puncture-resistant sharps container. Large-bore reusable needles should be placed in a puncture resistant container for transport to the reprocessing area.

- Although saliva has not been implicated in HIV transmission, to minimize the need for emergency mouth-to-mouth resuscitation, mouthpieces, resuscitation bags, or other ventilation devices should be available for use in areas in which the need for resuscitation is predictable.
- Health care workers who have exudative lesions or weeping dermatitis should refrain from all direct patient care and from handling patient-care equipment until the condition resolves.
- Pregnant health care workers are not known to be at greater risk of contracting HIV infection than healthcare workers who are not pregnant; however, if a health-care worker develops HIV infection during pregnancy, the infant is at risk of infection resulting from perinatal transmission. Because of this risk, pregnant health-care workers should be especially familiar with and strictly adhere to precautions to minimize the risk of HIV transmission.
- Implementation of universal blood and body-fluid precautions for ALL patients eliminates the need for use of the isolation category of "Blood and Body Fluid Precautions" previously recommended by CDC for patients known or suspected to be infected with blood-borne pathogens. Isolation precautions (e.g., enteric, "AFB") should be used as necessary if associated conditions, such as infectious diarrhea or tuberculosis, are diagnosed or suspected.

Failure to comply with standard precautions justified unsafe practice, see section J.

III. INVASIVE PROCEDURES

An invasive procedure is defined as surgical entry into tissues, cavities, or organs or repair of major traumatic injuries. These include but are not limited to:

- in an operating or delivery room, emergency department, or outpatient setting, including both physicians' and dentists' offices.
- the manipulation, cutting, or removal of any oral or perioral tissues, including tooth structure during which bleeding occurs or the potential for bleeding exists. The universal blood and body-fluid precautions listed above, combined with the precautions listed below, should be the minimum precautions for ALL such invasive procedures.

Health-care workers who participate in invasive procedures must routinely use appropriate barrier precautions to prevent skin and mucous-membrane contact with blood and other body fluids of all patients. Gloves and surgical masks must be worn for all invasive procedures. Protective eyewear or face shields should be worn for procedures that commonly result in the generation of droplets, splashing of blood or other body fluids, or the generation of bone chips. Gowns or aprons made of materials that provide an effective barrier should be worn during invasive procedures that are likely to result in the splashing of blood or other body fluids.

If a needle stick or any occupational exposure is encountered by the (student) healthcare worker please follow the following emergency procedures as noted in the CDC [Emergency Sharps Information](#).

- Wash needlesticks and cuts with soap and water.
- Flush splashes to the nose, mouth, or skin with water.
- Irrigate eyes with clean water, saline, or sterile irrigants.
- Report the incident to your supervisor.
- Immediately seek medical treatment.

IV. BLOODBORNE PATHOGENS

Please refer to the Dental Hygiene Clinic Manual for current program and Salt Lake Community College bloodborne pathogens policies and exposure control plan.

- Salt Lake Community College Bloodborne Pathogens Policy
- Salt Lake Community College Risk Management Incident Report Form
- Salt Lake Community College Workers Compensation Claim Form
- School of Health Sciences Student Requirements for Bloodborne Pathogens:
- The student is required to follow the clinical affiliates written exposure control plan.
- Prior to attending, SLCC requires all students to show proof of vaccination series or titer.
- The student is required to use all forms of personal protective equipment to include eye protection, gloves, gown, mask, lab coats, face shields, mouthpieces, resuscitation bags, pocket masks or other devices when exposure is suspected.

If a student is exposed during a clinical rotation, they should report the exposure immediately to the clinical educator. The clinical affiliate will treat the student with post exposure procedures and follow-up. Information for individuals receiving occupational exposure will be confidential and records will be kept by the facility for 30 years.

V. EXPOSURE PROCEDURES

The procedures outlined below should be followed immediately if you feel that you have been exposed. (It is **critical** that you do not wait to report the incident or to seek medical evaluation. Any significant exposure requires starting treatment within 1-2 hours of the incident.)

1. Notify your Clinical Instructor (CI) and appropriate Clinic Coordinator (CC) immediately that you have had a bloodborne pathogen exposure.
2. Identify the source of exposure. If you were exposed directly by another individual, get that individual's name and learn how that individual can be reached for immediate follow-up testing if necessary. If you were exposed through a wound inflicted by a needle or other

contaminated article, carefully bag and label the item and keep it isolated so that your CI or CC can retrieve it.

3. Fill out and sign exposure paperwork with the appropriate CC/Clinic Manager.
4. Have the CC/Clinic Manager notify SLCC Risk Management.
5. Your individual exposure incident will be evaluated right away by a knowledgeable physician to determine what course of treatment, if any, is required. Anyone significantly exposed should start treatment within 1-2 hours post-exposure. The Center for Disease Control (CDC) recommends immediate evaluation of bloodborne pathogen exposures to determine whether drug therapy treatment to prevent infection treatment should be initiated.

D. SCHOOL OF HEALTH SCIENCES STUDENT EXPOSURE POLICY

PURPOSE OF POLICY: Salt Lake Community College and the School of Health Sciences are committed to providing a safe and healthful environment to all students. In pursuit of this goal, the following Student Exposure Control Policy (SECP) is provided to eliminate or minimize occupational exposure to illnesses and/or blood borne pathogens in accordance with OSHA standard 29 CFR 1910.1030, “Occupational Exposure to Blood Borne Pathogens.” This policy is an addendum to the SLCC Bloodborne Pathogen Exposure Control Plan housed in the Office of Environmental Health and Safety.

APPLICABILITY: This policy applies to all faculty, staff and students who utilize the onsite lab spaces and/or participate in off-site clinical experiences in which there is the potential for exposure to pathogens.

PROCEDURE:

Each program within the School of Health Sciences is responsible for implementation of the SECP.

Program Administration: The School of Health Sciences Dean is responsible to update and maintain this procedure. The school recognizes that changes to protocol may change over time based on new standards of infectious control.

Those students who utilize the onsite lab spaces and/or participate in off-site clinical experiences in which there is the potential for exposure to Blood Borne Pathogens must comply with the procedures and work practices outlined here.

For onsite labs, each program will ensure program personnel and students have access to all necessary personal protective equipment (PPE), engineering controls (e.g. sharps containers), labels, and hazardous waste disposal bags as required by the standard. The division or departments using these materials will ensure adequate supplies of the aforementioned equipment are available in the appropriate sizes.

In clinicals and fieldwork experiences, students will be supplied with PPE and will adhere to protocol as directed by the site.

Students with Known Communicable Illness: Communicable diseases vary in their virulence, duration, mode of infection and effects. In order to protect students, patients, and staff:

Any individual with a known communicable disease which is transferred by air or contact are required to inform the clinical/lab course instructor as per the Attendance Policy. A written note from a physician may be required per program policy. Please see individual program handbooks for additional information on missing clinical/lab courses.

Methods of Implementation and Control:

Airborne Precautions:

Airborne precautions are required to be used when working with individuals whose symptoms, travel or exposure history, or other circumstances suggest the possibility of airborne contagious disease. Both the potentially infectious individual and those within the same room as this individual are required to don appropriate PPE as indicated by the clinical site.

Standard Precautions:

All students will utilize Standard Precautions. The concept of Standard Precautions states that all potentially infectious materials (PIM) must always be treated as if known to be infectious for HIV, HBV, or other bloodborne pathogens.

PIM include:

- Blood
- Saliva in dental procedures
- Vomit
- Urine and Fecal Material
- Cerebrospinal fluid, synovial fluid, pleural fluid, pericardial fluid, peritoneal fluid and amniotic fluid.
- Semen/vaginal secretions
- All body fluids in situations where it is difficult or impossible to differentiate between body fluids
- Any unfixed tissue or organ (other than intact skin) from a human (living or dead).

Engineering Controls and Work Practices: Engineering controls and work practice controls are the responsibility of the clinical placement sites.

Faculty/staff/students who are working with PIM must wear appropriate PPE at all times for the specific task or procedure being performed.

E. OSHA & HIPAA REGULATIONS

Hospitals and other health care facilities are required to follow the Occupational Safety and Health Administration (OSHA) and Health Insurance Portability and Accountability Act (HIPAA) regulations. These were established to protect the patients' and employees' safety and privacy.

OSHA involves requiring healthcare providers to wear personal protective equipment (PPE) when handling contaminated items. Therefore, students will be expected to wear appropriate PPE when in the clinical facilities.

HIPAA is designed to establish patient rights and privacy controls through a common set of standards and requirements about how to use and protect health information. This means the student will be expected to protect patient's privacy. Students may be required to attend additional training at the clinical facilities.

F. ALCOHOL AND DRUG SCREENING

The SLCC Dental Hygiene Program is dedicated to providing a safe working and learning environment for patients, students and clinical and staff. Healthcare organizations require that students who participate in the care of patients be subject to the same standards as their employees. Accordingly, both initial enrollment in the SLCC Dental Hygiene Program and subsequent placement at clinical sites is contingent upon presentation of a negative drug test. If a faculty member suspects a student of drug or alcohol use during class or clinic sessions the entire cohort may be required to submit to drug testing.

- **Applicability and Timing** - For all students enrolling in the SLCC Dental Hygiene Program, submitting a negative drug screen will be a requirement for admission. Repeat testing may also be required at future junctures in the program. Failure of the drug test or refusal to cooperate with any aspect of this policy, or any health system policy on substance abuse may result in disciplinary action up to and including refusal of program enrollment, denial of clinical course progression, or dismissal from the program.
 - **Cost** - The student is responsible for any and all cost of urine drug screening. The test will be conducted by an approved lab identified by the SLCC School of Health Sciences.
 - **Use and Care of Information on Drug Screening** - Test results will be confidential with disclosure of results provided only to approved persons involved in evaluating qualifications for continued enrollment in the SLCC Dental Hygiene Program. Because of the necessity to comply with health system policies, disciplinary action against students may be imposed without the customary mechanisms of a warning and probation period.
- Applicant's Responsibilities** - All students must complete a consent form for drug screening. If repeat testing is required during the program, students must complete testing within three (3) calendar days or seventy-two (72) hours of the assigned date at an approved testing lab. Failure to complete testing within the specified time frame may result in the applicant being denied admittance to the SLCC Dental Hygiene Program. If

an applicant is denied admission related to failure to completed drug testing, the applicant will be ineligible to reapply for admission to the program for one (1) year.

- **False or Misleading Statements** - Any false information contained on any forms pertaining to this policy will be grounds for immediate dismissal of a current student from the Program, or rejection of an applicant wishing to enter the Program.
- **Refusal to Participate in Drug Test** - If a prospective student refuses to provide a timely drug test upon entry into the Program, the student's application will be rejected, and the student will be ineligible for reapplication for one (1) year. Tuition may be refunded in accordance with the College refund policy as stated in the catalog.
- **Results** - Students complete the urine drug screen at an SLCC School of Health Sciences approved site. If the sample is clearly negative in the screening procedure, a negative report will be sent to the SLCC Dental Hygiene Program Director. In such cases, no further action is required. In the case of a positive test, a Medical Review Officer (MRO) will be charged with interpreting the results and contacting the applicant/student to disclose any prescription medications. If determined by the MRO that the further investigation proves a negative result, no further action is required, and the negative result will be sent to the SLCC Dental Hygiene Program Director. If further interpretation proves the results are positive, the MRO will notify the applicant/student and the SLCC Dental Hygiene Program Director. The students may be terminated from the program unless a retest of the split sample is requested at the time notification of test failure is given. The student is fully responsible for the cost of this additional test. If the results of the retest are still positive, the student will be terminated from the Program. Tuition may be refunded in accordance with the College refund policy as stated in the catalog.
- **Program Re-application** - Students who refuse the drug test or whose test results are positive for controlled substances, must show proof that they have been evaluated by a certified substance abuse professional who determines what, if any, assistance that student needs in resolving problems associated with drug abuse/misuse. Proof that the substance abuse professional is certified must be given to the SLCC Alcohol and Drug Program administrator. Students identified as needing rehabilitation must show proof of successfully completing the prescribed program before being allowed to re-enroll in the Dental Hygiene Program. This proof must be reviewed and approved by SLCC's contracted Medical Review Officer (MRO). If re-enrollment is approved, student will be subject to random drug testing during the duration of the program. If any test is positive, student will immediately be dismissed from the Program. This delayed progression counts as the student's one-time deferment.
- **Program Re-Enrollment** - Students who are re-enrolling in SLCC's Dental Hygiene Program after utilizing their one-time deferment will be required to submit documentation of a current drug test in accordance with the policy and procedure stated in this document above. The test must be completed, and documentation received in the Dental Hygiene

Program Administrative Office within three (3) days or seventy-two (72) hours of notification of re-enrollment approval.

- **Suspicion Based Testing** - The Dental Hygiene Department may request students submit to testing on a reasonable suspicion basis. The faculty member or clinical staff will approach the student if their behavior is inappropriate or questionable and will require immediate alcohol and/or drug testing. Refusal to submit to testing will be deemed a refusal and result in termination from the Program.

G. TECHNOLOGY IN THE CLASSROOM

- The advent of technology use in the classroom as an instructional tool has caused both opportunities and distractions. The expectations for the Dental Hygiene student are that you are engaged and present during class time, which means that you will be free from technological distractions. Research has shown that these distractions may cause individual inattentiveness and can make it difficult for others to stay focused on the immediate discussions. Devices including, but not limited to cell phones, laptops, High-Resolution DVR Spy Pens with webcam and microphone or any device (excluding ADA authorized devices) that may distract from the class must be silenced before entering the classroom and may not be on the desk during class or exams. Individual instructors may have policies regarding the use of technology in the classroom. If there is an emergency and a student must use their cell phone, please exit the classroom to take the call.
- Students discovered reading/sending text messages/emails or completing extraneous course work during assigned class or clinic times may be dismissed from learning sessions. Consequently, students may lose “professionalism points” for the day and potentially receive an unexcused absence for that class or clinic session. Unacceptable course behaviors include, but are not limited to, studying for another instructor’s exams, as well as completing and or submitting assignments during stated course time periods.
- Students are expected to be focused and fully engage with designated course materials presented/discussed during class sessions. While participating in class, student computer use is acceptable and encouraged to access textbooks, view class power point presentations, take notes, participate in learning activities, and research discussion topics.
- Students may not record or publish information from the class without written authorized use from the instructor. Unauthorized recording or sharing of course material is a breach of student professional conduct as outlined in the [Student Code of Rights and Responsibilities](#) (pg13-15) and is subject to disciplinary action (pg. 28-29).
- Students who record and/or publish anything related to the course or program may be placed on probation or dismissed from the program depending on the severity of the violation.

H. SOCIAL MEDIA

Students in the Dental Hygiene program at Salt Lake Community College are invited to join/follow the official college and program Facebook, Instagram pages at:

- https://www.instagram.com/slcc_hs/
- <https://www.facebook.com/groups/slccdentalhygiene/>

Students also have the right to develop a Facebook page or other social media pages of their own. If a page is created, it may not include the name Salt Lake Community College or SLCC Dental Hygiene Program wording or logo anywhere on the page. Students in the SLCC Dental Hygiene Program are to understand that the page is not an extension of the program, the classroom or the college.

At no time may confidential or personal information about classmates, faculty, or information of a private nature discussed in class be posted on social media. Any student violating this policy will be placed on immediate probation and/or dismissed from the program. Confidential or personal information includes but is not limited to:

- Personal information of a classmate, faculty, and clinical preceptor.
- Academic information of classmates.
- Derogatory comments of a classmate, faculty, and clinical preceptor.
- Classroom discussion/pictures or videos of procedures performed during clinical education.
- Information of the clinical site, patient information and any other information that may be obtained through the student practicum.

Social media constitutes the following but is not limited to:

Facebook (Meta)	WeChat/Wexin	Pinterest	LinkedIn
YouTube	TikTok	Twitter/X	Tumblr
WhatsApp	Snapchat	Reddit	Discord
Instagram	Telegram	Quora	etc.

I. STUDENT RECORDS/FERPA

A cumulative record is kept on each student in the program. This record contains admission application, personal references, and other pertinent information such as grades, performance evaluations, tests, etc., and is open to the student for personal review. Any other release of these records is determined by the provisions of the [Government Record Access and Management Act of Utah](#). This file is kept in the Program Coordinator's files for five years and then archived. Transcripts requests or grades must be referred to the [Registrar](#) (801-957- 4298).

FAMILY EDUCATION RIGHTS AND PRIVACY ACT (FERPA)

Personally identifiable information or records relating to a student will not be released to any individual, agency, or organization without the written consent of the student as described in FERPA regulations, except “Directory Information,” which may be released upon request unless the student specifically withholds permission to do so (directory information restriction).

Further information available about FERPA and student records retention is available on the website for the [Office of the Registrar and Academic Records](#).

Information that MAY be released about a SLCC student includes:

- | | | | |
|----------------------|--------------------------------------|-------------------------------|--|
| • Student name(s) | • Telephone number** | • Major field of study | • Email address |
| • Address** | | • Dates of Attendance | • Most recent previously attended school |
| • Enrollment Status | • Date of Birth | • Degrees and Awards Received | |
| • Student Photograph | • Email Address | • Enrollment status | |
| | • Participation in Activities/Sports | | |

*** Address and telephone numbers will not be released except in circumstances described in the School of Health Sciences (SHS) Release of Information form. This form is provided at the SHS Orientation.*

****No information may be released on a student with a “directory information restriction.”*

Students who wish to release personal information regarding the need for special accommodations or disability to an externship educator/site must sign a written release. Students may not provide personal information (phone numbers, addresses, email addresses, etc.) regarding fellow students to any source other than DH program academic faculty and fellow DH students. Classmate information cannot be shared with clinical sites, clinical educators (other than clinical coordinator), supervisors, job recruiters, etc.

J. PROFESSIONALISM/PROFESSIONAL CONDUCT

Professional conduct for the Dental Hygiene student encompasses standards of behavior related to ethics, morals, actions, knowledge and practices which have been established as the accepted way healthcare professionals will conduct themselves.

Students guilty of unsafe practice or blatant lack of professionalism will be subject to disciplinary processes up to and including:

- Reduction in total grade in associated course (clinic).
- Failure of associated course material or clinical competency.
- Letter of concern / program probation.
- Dismissal from the program.

UNSAFE PRACTICE

The safety of students, faculty, staff, and others must always be safeguarded, particularly during procedures where bloodborne pathogens are involved. Lack of careful attendance to established rules of professionalism and safety in clinical or laboratory courses is considered negligence and will not be tolerated. Unsafe behavior includes violation of accepted best practices, current standard of care guidelines, radiation hygiene, or OSAP infection control procedures. Examples of unsafe practice include but are not limited to:

- Inadequate sterilization and disinfection of equipment and work area.
- Improper use of PPE.
- Poor hand hygiene.
- Failure to follow infection control protocols.
- Improper handling and use of equipment, medication, or chemicals.
- Improper administration of medications, including administering wrong medication or dosage to a patient, improper storage or labeling of medication, unsafe administration of medication.
- Inadequate patient care and communication. Including communication with patients and with faculty/clinic staff.
- Unsafe clinical technique.

UNPROFESSIONAL CONDUCT

Student behavior will be *at minimum*, in compliance with the following rules:

- Students will provide the highest standard of care and treat their patients with respect and dignity regardless of race, ethnicity, national origin, age, disability, sex, or source of payment.
- Students will be scrupulously honest in completion of didactic and laboratory assignments, examinations, entries in patient, student, and other clinic records, in treatment rendered, and in their use of SLCC equipment and supplies.
- Students will conduct themselves in a mature, courteous, and professional manner in lecture halls, clinics, laboratories, and all other areas.
- Students who are disruptive, disrespectful, insubordinate, repeatedly arriving late after breaks, or are found sleeping in lecture hall/clinic/lab or other areas will be asked to leave and will be marked absent for that class. Repeated offenses may be grounds for dismissal from the program.
- Cell phones are ***NOT typically*** allowed in class/clinic/lab. All cell phones must be kept on silent mode & placed inside either purses/lockers or backpacks during class/clinic/lab. Text messaging is ***expressly prohibited*** during any course session. Cell phones may be utilized in clinical settings for translation purposes only.

- Absolutely ***no*** MP3 players, IPODS, earbuds/headphones or ***ANY*** other unauthorized electronic devices are allowed in class, clinic or lab. If a student wishes to audio tape ***or in any other way*** record or duplicate an instructor's lecture or ***ANY*** other materials presented, he/she must get ***written permission*** from the instructor first. The use of laptops or any personal electronic devices in the classroom are allowed only for note taking or specifically assigned internet research. Permission for in-class use of laptops or ***ANY*** personal electronic device may be revoked by the instructor anytime the privilege is abused. *
 - *Persons who violate these rules or disrupt class/lab/clinic will surrender their electronic devices to a public place in the front of the classroom until class is over. Repeated offenses may be grounds for grade reduction and/or termination from the program.
- In order to be notified in cases of personal/family emergencies the students will provide the number of the Clinic Manager (clinic: 801-957-6001/801-957-6005) to childcare providers, spouses, and/or others in advance. If an emergency then arises, the appropriate person should be told to contact the Clinic Manager with a message and the student will be summarily notified.
- Students will not bring minor children to lecture courses for any reason or to onsite clinic or clinical rotations unless they are specifically scheduled for an appointment.
- Students may not forward a message(s) or attachments from SLCC faculty, staff or administration that is intended only for their use. Attachments may contain information that is privileged and confidential or otherwise exempt from disclosure under applicable law; hence any unauthorized use, dissemination, distribution or reproduction of any message, email, or written communication is strictly prohibited.
- Students must be supervised at all times during clinical rotations. Students are not to arrive to their designated clinical rotation site outside of scheduled times to access patient schedules or other patient records.

As an important part of your educational experience, you will be reading and documenting in patient dental records. Use of these records in an educational setting is carefully guided by federal HIPAA regulations which include not divulging any patient information to anyone who does not need it for treatment or educational purposes. If patient information is shared in an educational exercise all identifying items such as: name, contact information and any other specifics which would identify them, must be removed. Discussion of personal patient information with other students for unauthorized purposes is strictly prohibited. Discussing identifying patient information with family, friends, or others not directly involved in the educational process is similarly prohibited. In addition, patient records are to be accessed by students ***ONLY*** in the clinic area. Students may not remove patient records from the clinic area at any time and must return the records to the front desk staff by 5:00 pm to be locked in the cabinets at the end of the clinic session. Patient records are ***NEVER*** to be stored in student lockers, clinic drawers, etc. Violation of any HIPAA regulation is treated very seriously and may carry severe sanctions up to and including dismissal from the program.

4.2 ACADEMIC STANDARDS:

A. GRADING POLICY

A minimum grade of “C” (75%) is required in all dental hygiene courses and other courses required for the AAS degree in order to be eligible to graduate from the Dental Hygiene Program. Core courses must be taken in sequence and a minimum of a “C” grade (75%) is necessary for all courses to progress from one semester to the next. **There is no opportunity for repeating a failed course in the Dental Hygiene Program.**

Course grades are computed as follows:

95-100%	A	75-77%	C
90-94%	A-	71-74%	C-
87-89%	B+	67-70%	D+
83-86%	B	64-66%	D
80-82%	B-	<63%	E
78-79%	C+		

*NOTE: The Dental Hygiene program does not award a D- grade. Although C-, D+ and D are awarded these are not passing grades and you cannot progress to the next semester if these represent the final grade for the course.

Minimum passing grades of 75% for all clinical and/or lab courses progress at an incremental build as follows:

Semester 1: Assessment Competency

Semester 3: Stage 1 Competency

Semester 2: Health/Gingivitis Competency

Semester 4: Stage 2 Competency

Individual grades **within** a course falling below 75% will elicit a “Letter of Concern,” indicating that the student is on academic probation within the program. Once on probation, the student must participate in academic counseling and remediation.

Receiving a **final** cumulative grade of less than 75% in *any* course will **end** the student’s participation in the program. A failed remediation in which the student does not meet the stated requirements within the time frame given will also end the student’s participation with the course. There is no opportunity for repeating a failed course.

B. ASSIGNMENT POLICY

Students in the Salt Lake Community College Dental Hygiene Program are expected to maintain good academic standing throughout the program. To develop an understanding and mastery of required coursework and competencies, students must invest appropriate time, energy, and focus. Therefore,

student participation in course discussions, learning activities, assignments, lab and clinical assessments is mandatory.

GRADING REQUIREMENTS

All learning experiences, in which students are provided grading criteria, must be completed according to assignment guidelines and grading rubrics with a passing grade (75% a “C” or higher) to maintain good standing in the program. These include but are not limited to:

- Quizzes
- Exams
- Written assignments
- Class presentations
- Case studies
- Homework
- Group projects
- Clinical requirements
- Process evaluations
- Practicums
- Competencies

The passing grade for all Dental Hygiene courses is 75%. If the final grade for any course falls below 75% the student will not pass the course and cannot advance in the program. Failure to advance in the program will result in dismissal from the program.

CLINICAL ASSIGNMENTS/REQUIREMENTS

- Students are required to provide their own patients to complete all required clinical assignments, task competencies, competencies, and clinical exams.
- Failure to successfully complete ALL clinical requirements may result in course failure and dismissal from the program.

C. EXAM/TESTING POLICY

Quizzes and exams must be taken on the day they are scheduled during the course. A missed examination will only be allowed to be made up at the course instructor’s discretion and may result in a score of zero. For an excused absence and with advance notice, the course instructor may allow the student to make up an **exam**. However, that exam may not be the same as the scheduled date and may include essay questions or oral presentations of required material. Exams missed due to *unexcused* absences will not be made up.

Students are also never allowed to re-take an exam simply to improve their score.

Students guilty of academic dishonesty concerning testing are subject to immediate dismissal from the program.

D. COURSE WITHDRAWAL/INCOMPLETE POLICY

The Dental Hygiene program will follow [institutional policy](#) regarding course withdrawals, administrative drops for non-attendance, and failure to drop/withdraw.

INCOMPLETE GRADES

A student's request to receive an incomplete course grade will be considered on a case-by-case basis and only granted according to the following criteria:

- Emergency circumstances as identified by the Program Coordinator in consultation with the relevant Clinical Coordinator and appropriate faculty.
- A minimum of seventy percent of course requirements must be completed with a current passing grade (minimum of a "C" or 75%)
- Incomplete grades will be given only in extenuating circumstances, beyond the student's control, with appropriate documentation. Since coursework is sequential, students must establish proficiency by successfully completing course requirements at each level prior to proceeding to a more advanced level and continuing in the program.
- The student must meet with the Program Coordinator and Clinical Coordinator and submit an Incomplete Grade Form. Additionally, the student must abide by a contract that outlines work to be completed and or tests to be taken within the context of the semester immediately following the semester of incompleteness. The course instructor will determine the timeline for the resolution of the incomplete course grade. If the contract is not fulfilled within the specified time, the incomplete grade will be changed to a failing grade of E. (AppendixFormB)
- An incomplete course grade may only be granted during semesters 1, 2, or 3 of the Dental Hygiene Program. Only (1) one incomplete course grade may be granted per student during the four-semester duration of the program.
- If a student is dismissed due to academic failure to complete the designated course or receives an unsatisfactory grade in any course, the interested student will need to re-apply to the Dental Hygiene Program according to the selective admissions process and will not be given special consideration for re-acceptance. A student will need to reapply to the program and meet all requirements or any changes/prerequisites to the program before they are admitted to the program as a new student.

E. SATISFACTORY PROGRESS/DISMISSAL POLICY

Satisfactory progress required for continuance in the SLCC Dental Hygiene program includes achieving, at minimum, an overall course grade of a "C" (75%) in all core courses **AND** successfully passing all exams, major assignments, all competency evaluations and course requirements. Students are required to complete all duties of a Dental Hygienist that meet the industry standards. Additionally, students *MUST* maintain safe practice and professional/ethical conduct in clinical settings and scrupulous honesty in all matters, academic or clinical, and at all times. Failing to do so may result in immediate dismissal from the program.

Any time a student receives a grade on a major test or assignment **within** a didactic course below a "C" (75%), the student will receive a *Letter of Concern* from the appropriate faculty member

indicating that they are on academic probation within the program. This letter mandates that the student meet with the instructor to determine the cause of the poor performance and then outline and complete a remediation plan to bring up the course grade on future assignments/tests. Student didactic and clinical grades are regularly posted online for student review and faculty are available to discuss any concerns that students have as needed during the term. The *Letter of Concern* will be presented to the student in conjunction with the [School of Health Sciences Program Probation Form F](#).

Clinical satisfactory progress also is closely tracked to determine areas of weakness. In clinical courses, students are given daily grades on their work through various evaluation forms and the online grading system Tal Eval. If a student is struggling with a particular skill, it is noted by the instructor and is discussed with the student at the end of the clinical session.

If a student continues to struggle, a more formal remediation process occurs involving a Learning Rx wherein the Clinical Coordinator meets with the student and reviews past performance and, with student input, writes a formal plan of remediation based on specifically targeted skills or skill sets. This plan includes the performance level expected and date(s) by which the targeted skill(s) will be reevaluated for progress. As the student rotates through different Clinical Instructors, this form follows them until the appropriate progress is made, at which point the Learning Rx is signed & considered complete. If the student continues to fail in these or other skills, further performance evaluations will be instituted until success is achieved. If the student is ultimately unable to successfully meet the industry standard in critical clinical skills in a timely manner, they may be dismissed from the program.

Any student who wishes to challenge and appeal final grades must follow the procedures in the School of Health Science Appeals Process (see section [N. College Grievance Policy](#)).

Receiving a **final** cumulative grade of less than 75% in *any* course will **end** the student's participation in the program. There is no opportunity for repeating a failed course. If a student is dismissed due to academic failure or Student Code of Conduct infractions, the interested student will need to re-apply to the Dental Hygiene Program and will not be given special consideration for re-acceptance. Some [Student Affairs Code of Student Rights and Responsibilities](#) violations may prevent a student from re-entering the program at any time.

F. SCHOLASTIC INTEGRITY

Academic dishonesty is unacceptable behavior for any student and is a clear violation of the [Student Affairs Code of Student Rights and Responsibilities](#) and the higher level of conduct expected of a health care professional and may warrant immediate dismissal from the program. Academic dishonesty is defined as: "Any unauthorized act that may give a student an unfair advantage over other students," which includes but is not limited to:

- Cheating or assisting another student in cheating on assignments, presentations, or written/clinical examinations of any kind. Talking to other student(s) during a quiz or examination will be presumed to be cheating.
- Discussing exam details with other students. I.e. Providing information on an exam to a classmate who has not yet taken the exam.
- Plagiarism of any kind, including presenting the scholarly work of another as one's own or presenting AI generated work as one's own.
- Representing another's assignment, project, or clinical work as one's own.
- Falsifying or forging patient/student/other clinical records, including attendance records.
- Misuse of SLCC equipment and/or supplies, including the use of equipment and/or supplies for unauthorized purposes.
- Misrepresentation in the presentation or collection of patient fees.
- Misconduct in conducting patient care such as:
 - Initiating patient treatment without authorization.
 - Providing treatment without proper supervision.
 - Providing unauthorized/unnecessary treatment.
 - Treating patients while under the influence of alcohol and/or drugs.
 - Behaving in a way that could be construed by the patient as verbal/sexual harassment or as being verbally/physically abusive.
 - Abandoning a patient prior to completion of treatment without notification.
 - Accessing patient records at clinical site without supervising faculty present.
 - The practice of any dental hygiene education, training, experience or competency outside an authorized educational setting and, or, without a professional license.

****Additional academic and non-academic disciplinary offenses are actionable by SLCC as stated in the Student Affairs Code of Student Rights and Responsibilities. In addition, dental hygiene students are held to higher standards of ethical and professional behavior as defined by the American Dental Hygiene Association and itemized in other sections of this document.*

G. STUDENT PRACTICE STANDARDS

Students enrolled in the Dental Hygiene Program at Salt Lake Community College are required to adhere to standards of ethical behavior and professional conduct in all their endeavors.

To lawfully practice as a registered dental hygienist, students must complete all course requirements, graduate from the Salt Lake Community College Dental Hygiene Program, pass required board certification exams, and apply for state licensure.

With, or without the supervision of a licensed dentist, laws in the United States of America prohibit the unlicensed practice of dental hygiene. Practicing dental hygiene outside the confines of an

educational institution, without an appropriate state license is a criminal act. Dental hygiene is defined as conducting assessments or performing tasks that lead to the formulation of a dental hygiene diagnosis and the implementation and/or completion of a patient treatment plan. Such tasks include, but are not limited to, periodontal probing, the administration of local anesthesia and the removal of accretions from the subgingival surfaces of teeth. Consequently, students must sign a Salt Lake Community College Dental Hygiene Program Student Practice Standards agreement not to practice dental hygiene outside of program authorized clinic sessions.

H. GRADUATION REQUIREMENTS

In addition to the core courses of the Dental Hygiene Program, other courses are required for graduation with an A.A.S. in Dental Hygiene from SLCC. These graduation requirements are listed in the SLCC general catalog. Students are responsible for the timely completion of all graduation requirements based on the catalog year they were admitted into the program. SLCC advisors and dental hygiene faculty/administration are not accountable for a student's failure to fulfill the necessary requirements to graduate with their class. Students must apply for graduation within the academic school year of graduation, as stated on the [SLCC website](#).

Students must understand that **GRADUATION** (not just course completion) from a CODA accredited Dental Hygiene Program is an absolute prerequisite to being licensed as a Registered Dental Hygienist and sitting for national and regional board examinations.

I. COMMUNITY SERVICE REQUIREMENT

Each student must complete a **total of 40 hours** of non-profit dental-related community service during the two years in the SLCC dental hygiene program. A **minimum of 10 hours** must be completed by the end of each semester in the dental hygiene program for a minimum of 40 hours. Hours accrued during summer break will be counted towards total hours but do not take the place of the 10 hours needed per semester. Five community service hours may be applied to the total 10 in the subsequent semester. If students fail to meet this requirement, graduation from the SLCC Dental Hygiene Program may be postponed until its completion.

Assigned graded course projects are **NOT** counted toward community service requirements. Hours spent volunteering in an individual dental office also do **NOT** qualify as community service time. A maximum of ten hours with a specific community organization or at one location or event will be accepted as part of the required total of 40 hours.

If a student chooses to exceed the total number of community service hours required during the two-year program, or within a given semester, or with an organization or venture, these hours should still be documented and accrued within that student's total number of volunteer hours.

All community service hours are to be documented on the appropriate form, signed by both the supervisor of the service project and the appropriate Clinic Coordinator and then turned into the Program Coordinator for recording in the student file. Undocumented hours will not be counted

toward the community service requirement. Approved dental hygiene-related activities include, but are not limited to:

K-12 school presentations	Community Events
Disparities Clinics	Humanitarian Efforts
Give Kids a Smile	Junior League Care Fairs
Clinic Special Olympics	Global Relief Humanitarian Effort

Failure to meet the minimum community service requirement will result in failure to advance in the program.

J. READMISSION POLICY

If a student dismissed due to academic failure or [Student Code of Conduct](#) infractions would like to be considered for re-entry to the program, the interested student will need to re-apply to the Dental Hygiene Program according to the selective admissions process and will not be given special consideration for re-acceptance. A student will need to reapply to the program and meet all requirements or any changes/prerequisites to the program before they are admitted to the program as a new student.

K. DEFERMENT POLICY

A student admission deferment may occur when an accepted student chooses to delay their position within the program. Deferments must be requested before classes are missed. In order to qualify for a deferment, the student must be in good standing in all relevant course work and must have sound reasoning for needing the deferment.

1. Students must be currently accepted into the Dental Hygiene program prior to deferment request. Some reasons for deferment with a temporary withdrawal include:
 - a. Prolonged illness, injury, or disease that is expected to improve
 - b. Religious mission opportunities
 - c. Military deployment
 - d. Pregnancy
 - e. Other reason as agreed and collaborated between the student and the DH Program
2. Students who are approved to withdraw for a deferment will have their slot held for a period of one year. In this case students can return into the beginning of the same semester in the program in which they stepped out, and they will need to complete any incomplete classes from the start of the course.
3. Students must receive a grade of a C or higher in all DH courses at the time of a deferment request for a program deferment to be approved. If a student is not receiving a C or higher in all classes at the time of their deferment request, DH Program deferment will not be approved, and the student must apply for re-entry to the program. A slot will not be held

for students on probation at the time of their deferral request. Students who are on probation and leave the program must apply for re-entry to the program.

L. PROGRAM AND COURSE WITHDRAWAL POLICY

Withdrawing from a course in the program will lead to immediate dismissal from the program, as all courses are completed in a required sequence. In the case of a deferment or program withdrawal, it is the students' responsibility to complete the required documents needed to drop or withdraw from any impacted courses. Failure to withdraw or drop a course by the deadlines listed on the college academic calendar will result in an "E" on the student's transcript.

It is the student's responsibility to request a withdrawal or drop from each individual course.

- Students who quit attending class without an official withdrawal initiated by the student will remain on each instructor's class roster and continue to accrue a grade until a withdrawal or drop in that class has been completed.
- Faculty will not automatically withdraw or drop individual students from courses or the program without a written request and completed paperwork that meets the withdraw criteria past the withdraw date.
- If the student does not initiate a drop or withdrawal, a failing grade for the coursework could result.
- DH faculty will not sign a withdrawal if the student is failing the course at the time of the request. This is college policy.

M. ADVANCED STANDING POLICY

The SLCC Dental Hygiene Program does not currently offer acceptance to students with advanced standing.

N. ACADEMIC GRIEVANCE POLICY

The School of Health Sciences Appeal Procedure (available upon request) functions in accordance with the [Salt Lake Community College Student Code of Conduct](#) (the Student Code) Section III.B.4.c. For the purposes of this procedure, business days are based upon the college's academic calendar and excludes weekends, holidays, and official college break periods and closures. The following levels may be completed by students who have the right, as per the Student Code, to grieve a grade, warning (verbal or written), suspension, or dismissal received within a program of study.

INFORMAL COMPLAINT

Issues between students and a faculty/instructor, staff member, or administrator should be first discussed between those involved in the issue, if at all possible. For most issues it is anticipated that a resolution between the student and the faculty/instructor, staff member or administrator

can be reached with an informal discussion of the issue. In the case that the student is unable to address the issue directly with those involved, or the issue is addressed but not resolved, the student may opt to escalate the concern through the following process.

LEVEL ONE:

If a successful resolution is not forthcoming with the individuals directly involved, the student may choose to make an appointment with the program coordinator to address their concerns.

The student is held to the standard within the program handbook regarding the process for appeal to the program coordinator.

If the issue is with the program coordinator, and resolution was attempted and failed in the informal stage the student may move directly to level two.

LEVEL TWO:

If the outcome of the program appeals process is not to the student's satisfaction, the student has (5) business days from their receipt of the outcome to submit a written appeal that includes a statement of the issue and any evidence in its support, the resolution sought, and the student's signature to the Associate Dean.

The Associate Dean will request documentation and evidence from any faculty that may be involved in their investigation of student appeal request.

The Associate Dean will notify the student through a formal letter within five (5) business days of their decision whether a conference with the student is warranted and if so, will schedule a conference date.

If a conference is not warranted this letter will notify the student of the Associate Deans decision on the matter.

If a conference is warranted a conference will be scheduled and the Associate Dean will notify the student through a formal letter within five (5) business days of completion of the conference of their decision to approve or reject the student's appeal.

LEVEL THREE:

Within five (5) business days after the receipt of the formal letter from the Associate Dean, the student may submit a written appeal to the Dean of the School of Health Sciences.

The Dean will review the appeal, all evidence, and render a decision to the student within ten (10) business days of receiving the formal letter from the student.

The Dean will notify the student, in writing, of his/her decision to uphold, modify or dismiss the decision and possible sanction(s) imposed by the faculty member.

The decision of the Dean is final and cannot be appealed.

NOTE: The SLCC School of Health Science Appeal process, and the SLCC grievance procedures are separate and distinct from any formal legal proceedings. These procedures are designed to provide students with due process, procedural fairness, and developmental growth opportunities and ensure equal protection for all students. Due to this expectation, legal council is not assumed to be present during any scheduled meetings in the appeals process. If either party determines that legal council is necessary, this must be relayed during the scheduling of the meeting to provide adequate notice and allow for time to secure equivalent council if desired by both sides.

4.3 ATTENDANCE STANDARDS

A. ATTENDANCE

Regular attendance in a professional school such as SLCC Dental Hygiene program is essential to provide the prerequisite knowledge and skills that are foundational to each ensuing class/clinic/lab session. Consistent punctual attendance in *ALL* lectures, laboratory, clinical sessions and other assigned venues (dental/dental hygiene annual conventions, community assignments, etc.) is critical to student success and is considered a minimum requirement in this rigorous field of study.

Infrequent legitimate reasons for absence may include:

- unexpected personal/immediate family illness verified by a physician's note,
- an accident verified by a police report/insurance claim,
- a verified death in one's immediate family.

****Health care and other personal appointments are **NOT** considered legitimate reasons for absence and **MUST** be scheduled during non-class hours.*

Two absences will be allowed per course during the semester without negative consequences. Students are still responsible for making up any missed work or clinical experiences.

Multiple excused absences (i.e. more than two per course per semester) are **strongly discouraged** due to the significant impact on the student's learning and the collaborative nature of clinical and classroom activities. Additional excused absences may result in consequences such as required remediation, reduced participation grades, or other interventions as determined by faculty up to and including dismissal from the program. These measures are intended to preserve the integrity of the learning experience for all students.

Absences from clinic **MUST** include notification of the student's assigned patient for that clinic session. In addition, students must contact the Clinic Manager (801-957-6005 or 801-957-6001) and Program Coordinator or course instructor prior to the start time for the class/clinic/lab session. Make-up work for any absence must be arranged with the Clinical Coordinator or course instructor no later than 5 days after the absence occurs. Quizzes missed during an absence will be allowed to be made-up at the discretion of the course instructor. Extended/repeated absences may result in more severe consequences up to and including significant grade reduction and/or dismissal from the program. If there are extenuating circumstances requiring extended/repeated absences this will need to be addressed with the Program Coordinator. Please see sections on student illness and withdrawal/deferment.

B. TARDINESS POLICY

Arriving late for class/clinic/lab is disruptive and requires needless repetition of course material by the instructor and as such is not acceptable. A tardy is a late arrival or early exit from class.

- Late Arrival: A student arriving after the class has started.
- Early exit: When a student leaves class before class is excused.

Students are allowed **two** tardies per course during the semester without repercussions. If three (3) or more total tardies are accrued during one semester they will be counted as an absence. Additional tardies may result in the loss of up to ten percent of the final course grade. Anyone who arrives more than fifteen (15) minutes beyond the start time of the class or leaves more than fifteen (15) minutes before the end of class time, will be marked as an **absence** for that day. Tardiness policy also applies to timeliness in returning to class after scheduled breaks.

**Tardiness and attendance issues may be considered on a case-by-case basis.*

C. MILITARY LEAVE

- Students will receive an excused absence from each class for a two (2) week annual training. Students must work with faculty to coordinate due dates for make-up assignments/exams to be completed no later than two (2) weeks of return. Preference is to turn in assignments and complete exams prior to the absence, if possible. A required military annual training will not affect a student's standing in the program.
- Students absent over two (2) weeks and up to a year will receive a program deferral (in good standing). The student will be provided admission preference into the next year's cohort

beginning with courses not completed. 1. Example—if withdrawn in the 4th semester of the program, student tuition will be returned (according to federal law) for that semester. Educational VA benefits will restart for a repeat of that 4th semester the following year. 2. Example—if returning before the 4th semester of the program, students may (and are advised to) audit courses previously taken again to be current with the material. Contact the SLCC Vet Services for tuition waiver opportunities for auditing.

- Students deployed over one (1) and up to two (2) years will be given admission preference into the next year's cohort but must begin with first semester courses. Contact the SLCC Vet Services for tuition waiver opportunities.
- Students deployed over two (2) years will need to reapply to the program.

D. JURY DUTY

Students will be allowed to miss classes with no penalty for verified jury duty. Students must work with faculty to coordinate due dates for make-up assignments/exams to be completed upon students return. Preference is to turn in assignments and complete exams prior to the absence, if possible. A required jury duty will not affect a student's standing in the program. Students are required to provide written evidence of Jury Duty.

Extended Jury Duty over two weeks in duration may require a program deferral including withdrawal from courses. The student will be allowed to repeat the courses upon return with no penalty.

5.0 CLINICAL EDUCATION STANDARDS

5.1 CLINICAL AFFILIATES

SLCC Dental Hygiene Clinic
SLCC Jordan Campus
3491 West Wights Fort Rd.
High Tech Learning Center, Room 133

Community Building Community (CBC) Clinic
49 W Center St
Midvale, UT 84047
(Minor activity site)

Roseman University of Health Sciences College of Dental Medicine
10894 S River Front Parkway
South Jordan, UT 84095
(Minor activity site)

5.2 PROFESSIONAL CONDUCT AND PERFORMANCE GUIDELINES

Dental Hygiene is a profession that requires high standards of behavior in addition to the mastery of a large body of knowledge and clinical skills. In addition to fulfilling all academic requirements, students are required to display behaviors consistent with accepted standards of professional conduct.

The following personal characteristics and attitudes include but are not limited to those observed and evaluated throughout the dental hygiene curriculum. Students are expected to demonstrate these characteristics, both in their academic and personal pursuits.

- **Appearance:** Displays appropriate professional appearance and is appropriately groomed as defined in the SLCC Dress Code and the Dental Hygiene Program Dress Code.
- **Attitude:** Is actively concerned about others. Maintains a positive outlook toward others and toward assigned tasks. Recognizes and admits mistakes. Seeks and accepts feedback to improve performance.
- **Dependability:** Completes tasks promptly and well. Arrives on time and actively participates in clinical and didactic activities. Follows through and is reliable.
- **Function under stress:** Maintains professional composure and exhibits good personal and clinical judgment in stressful situations. Recognizes the importance of maintaining professional behavior in the clinical setting, regardless of potential inappropriate action on the part of others.
- **Initiative:** Independently identifies tasks to be performed and makes sure that tasks are completed satisfactorily. Performs duties promptly and efficiently. Is willing to spend additional time and to assume new responsibilities. Recognizes when help is required and when to ask for guidance.
- **Integrity:** Displays honest in all situations and interactions; is able to identify information that is confidential and maintain its confidentiality.

- **Tolerance:** Demonstrates ability to accept people and situations. Acknowledges his/her biases and does not allow them to affect patient care or contribute to inappropriate interactions with others.

5.3 CLINICAL EXPECTATIONS

A. SIMULATED/PATIENT IN THE EDUCATIONAL ENVIRONMENT

An essential part of your educational experience, particularly when first learning clinical skills, is to sit as a patient for your classmates to practice upon. You must be a willing and cooperative “patient” during these learning experiences so that the educational process for both yourself and your partner is facilitated. You will never be asked to sit for occasions such as repeated radiographic procedures, etc. that would be unsafe or harmful. Patient experiences you **will be** asked to sit for include, but are not limited to: patient operator positioning, home care education, initial instrumentation skills including the use of explorers, probes and calculus and plaque removal instruments, placement (not exposure) of radiographic film or sensors, you **may be** asked to sit for needed radiographic surveys, dental sealants or fluoride treatments. In your second year, during DH 2341 Anesthesia Lab you will also be required to sit as a patient for intraoral local anesthesia injections. A minimal amount of anesthetic (without vasoconstrictor) will be injected. In addition, students will be asked to sit as a patient for the administration of nitrous oxide, during which a minimal amount of nitrous oxide/oxygen will be administered.

You will be provided with consent forms for clinical and anesthesia practice courses.

B. DENTAL HYGIENE PROCESS OF CARE STANDARDS

The dental hygiene care model at the Salt Lake Community College encourages students to deliver comprehensive patient-centered care. Comprehensive dental hygiene care is defined as integrated preventive and treatment services provided by a dental hygienist to meet the identified needs of the individual patient.

The first step to delivering effective, comprehensive care is a systematic dental hygiene assessment and diagnosis. Using information gathered during the assessment phase, the student, in collaboration with the Clinical Instructor, will formulate a dental hygiene diagnosis that will allow them to develop a treatment plan to direct patient treatment and sequencing according to the patient’s specific needs. Patient dental hygiene care is then directed according to the plan.

Dental hygiene students are considered “colleagues in training” (CIT), and as such are expected to uphold and maintain the same standards of patient care that are expected of professional dental hygienists. Even though the CIT may not be ready to assume total responsibility for the process of care, they must continually aspire to meet professional standards; thus, they must know and understand the Dental Hygiene Process of Care Standards. Faculty mentors assist the CIT in providing dental hygiene process of care in accordance with the standards.

C. PRACTICE AND PROFESSIONAL STANDARDS

Dental hygienists are responsible and accountable for their dental hygiene practice and conduct. Dental hygienists:

- Adhere to current jurisdictional legislation, regulations, codes of ethics, practice standards, guidelines, and policies relevant to the profession and practice setting.
- Seek and advocate for practice environments that have the organizational and human support systems as well as the resource allocations necessary for safe, competent, and ethical dental hygiene practice.
- Access and utilize current research-based knowledge through analyzing and interpreting the literature and other resources.
- Manage their dental hygiene practice utilizing evidence-based decision-making within the practice setting.
- Question, and if necessary, take action regarding policies and procedures inconsistent with desired patient outcomes, evidence-based practices, and safety standards; evidence-based decision-making is the systematic application of the best available evidence to the evaluation of options and decision making in clinical, management, and policy settings.
- Follow dental hygiene process, demonstrating sound professional judgment and integrity.
- Recognize patient rights and the patient's inherent dignity by obtaining informed patient consent, respecting privacy, and maintaining confidentiality.
- Demonstrate cultural competency by using a patient-centered approach, always acting or advocating in the patient's best interest.
- Provide a safe environment that meets universal infection control and workplace health and safety requirements and protocols.
- Respond to emergency situations.
- Consult and collaborate with other colleagues, health professionals, and experts as necessary.
- Maintain documentation and records consistent with regulatory requirements.
- Identify technological and product options; select the best option for the situation and patient need.
- Recognize, acknowledge and ask for help with any personal, physical or psychological condition that affects, or may affect, the ability to practice safely and effectively.
- Maintain competence through lifelong learning.
- Support the professional association through personal membership.

5.4 DRESS CODE

Dress code during clinic/laboratory sessions and rotation assignments is based on principles of professionalism, safe practice, and OSAP/BBP infection control policies and is required as follows:

Uniforms or medical scrubs must be worn under lab jackets or procedure gowns (*lab jackets/procedure gowns are **NEVER** worn outside the SLCC dental hygiene clinical area*)

- Two sets of program-designated uniforms/scrubs must be purchased. The required uniform color will be shared with incoming first year students during the summer orientation meeting. Students will **NOT** be required to purchase uniforms from any specific dealer but will be limited to color as announced during orientation. In addition, the uniform/scrub top must be professionally embroidered with the approved SLCC logo, the student's first name, last initial and SDH (denoting "student dental hygienist").
 - A plain (no logo) t-shirt may be worn under the scrub top (as long as it doesn't show outside the uniform).
 - Scrub pants must NOT be so long as to drag on the floor or become ragged or discolored due to excessive length.
 - Uniforms must be clean and pressed and be without stains, holes, tears, bleach marks, etc.
 - If student presents in inappropriate/unprofessional attire or appearance, program faculty/administration may dismiss the student from clinic. Student must correct the deficiency before returning.
- It is recommended that students keep an additional, clean uniform in their clinic locker in case a change of attire becomes necessary.
- Impeccable personal and oral hygiene is essential, including the use of deodorant. Additionally, students must not enter clinical areas smelling of cigarette smoke, heavy perfume, or other strong odors.
- Hair must be clean, tidy, and well-controlled. It should not fall into the student's or instructor's field of vision/operation. If hair retaining accessories are worn, they must be small, conservative and easily disinfected.
 - It is **NOT** appropriate to wear hair or decorative extensions in clinic.
 - If hair is more than chin-length, it must be pinned/pulled back in a tidy fashion; without locks falling forward or touching the shoulders.
 - Shorter hair may be worn in a conservative style as preferred, including natural color.
 - Un/lightly scented hairspray may be used only as needed for control.

- If facial hair is present, it must be clean and well groomed. Facial hair must comply with facemask manufacture recommendation for appropriate, safe use.
- Nails must be clean, well-manicured have intact cuticles and be trimmed short (such that the nail is not visible over the fingertip when viewed from the palm side of the hand).
 - The following are expressly prohibited:
 - Any kind of artificial nails, including but not limited to acrylic nails, tips or gel overlays.
 - Nail polish.
- Hands must be clean and free from open, abraded, or weeping lesions. If any of these conditions exist, students must consult with faculty regarding the need to wear additional barrier protection or to avoid intraoral procedures until the condition improves.
- Jewelry should not be functionally restrictive or excessive. If jewelry is inappropriate, students may be dismissed from clinic until the situation is resolved.
 - A small stud earring is acceptable, but a student may be asked to remove earrings deemed as inappropriate by faculty/staff. Wearing more than one earring in each ear is prohibited. There should be no visible jewelry or body piercings (e.g., tongue, eyebrow piercings etc.), with the exception of earrings. Nose piercings that have religious significance are acceptable. In clinical and laboratory settings, small, stud-type earrings (not to hang beneath the lobe) are acceptable.
 - **Rings are prohibited for the following reasons:**
 - Interference with the efficacy of washing and disinfection of the skin which is vital to preventing cross-contamination.
 - Skin underneath rings has shown to have increased colonization of microorganisms as compared to other areas of the skin.
 - Rings and other hand jewelry may cause gloves to tear and may interfere with the ability to wear correct glove size, in addition to negatively affecting the integrity of the glove.
 - Wrist jewelry and bracelets are prohibited during clinic and labs when patient care may occur. Watches may be worn under gown.
 - Necklaces, if worn must be small and worn under clinic gown.
- Contaminated clinic attire must be removed before leaving the clinical area and be washed routinely using bleach/antimicrobial detergent and kept separate from other personal clothing.
- Students **MUST** have a pair of shoes appropriate for and designated **ONLY** for clinical use at SLCC (remain in the building) and be stored in a closed container in the student's locker. Clinic shoes must be:
 - Predominantly black or white,

- Fabricated of leather or vinyl (nursing or conservative athletic shoes preferred),
 - Have non-marking soles,
 - Clean, (water resistant, able to be cleaned with disinfectant and/or soap and water)
 - Supportive,
 - Completely cover the foot including toe and heel (with no openings or holes).
- Socks are **required** clinic wear and must be:
 - Scrupulously clean,
 - Mid-calf to knee length (i.e. completely cover any exposed skin beyond the length of the pant, especially while sitting).
- Strong body scented products such as perfume, scented body lotions, cologne, hair spray, aftershave, etc. are **expressly prohibited**.
- If worn, make-up, should be subtle and carefully applied prior to entering clinic.
- False eyelashes and/or eyelash extensions and hairpieces are **expressly prohibited**.
- Program-issued name tags must be worn, disinfected and stored in student locker at the end of each clinic day.
- Students who are or become pregnant during their time in the program are strongly recommended to inform the ADS as soon as feasibly possible. Students who are pregnant in the program will be required to use a fetal dosimeter badge in addition to their student dosimeter badge. The fetal dosimeter badge will be provided by the Dental Hygiene program. The fetal dosimeter badge will need to be worn at waist level during clinic/lab and turned in at the end of every month.
- Chewing gum, eating, or drinking is expressly prohibited while in the clinical and/or lab settings. Food and drink are not allowed on the clinic floor.
- Special requirements for particular labs and clinics will be designated by the instructor. If a student is not appropriately attired, the instructor may ask him/her to leave and correct the deficiency before returning.

****Violation of the dress code may result in the loss of “Core Evaluation” points each day. Flagrant/repeat violations of the dress code may result in percentage reductions in the total clinic grade and more severe consequences up to and including dismissal from the program.*

5.5 CLINICAL SUPERVISION

Students will always be supervised during clinicals. It is the student’s responsibility to ensure procedures are not performed unsupervised. Students cannot be onsite for any reason without supervision. Students are not to visit clinical sites in their capacity as SLCC Dental Hygiene students outside of supervised times.

5.6 RADIATION MONITORING

Due to updated x-ray equipment leading to decreased radiation exposure for the student, dosimeter badge monitoring is no longer required in clinic unless student reports pregnancy.

5.7 ACCIDENTS/INCIDENT REPORTS

All accidents that occur while on clinical assignment involving patients, clinic personnel, personal injury, and/or damage to equipment must be immediately reported to the clinic manager and clinical coordinator. Documentation of the incident will be completed in accordance with institutional policy.

5.8 PATIENT CONFIDENTIALITY

DH students will ensure confidentiality of all persons associated with the DH Program including other students, externship clients, faculty and clients from the DH clinic in accordance with the Code of Ethics and Salt Lake Community College.

5.9 CLINICAL RESPIRATORY PROTECTION PROGRAM

Some of the procedures students will be performing in the dental hygiene lab will result in particulates that create a respiratory risk. Students participating in these procedures must adhere to lab processes and wear all appropriate PPE including face masks and OSHA approved eye protection.

N-95 or KN-95 masks are not required by OSHA for these procedures. However, for students who would prefer to have this level of respiratory protection these masks are available within the lab.

If you would like to utilize N-95 or KN-95, please notify your clinical coordinator and the office manager. Students utilizing N-95 will be required to be FitTested for their mask to ensure proper fit.

Instructions on FitTesting will be provided to students who would like to utilize this level of PPE for particulate generating procedures.

6.0 ACKNOWLEDGEMENT OF PROGRAM POLICIES

Dental Hygiene Program

Handbook Acknowledgement

I, _____ have read and understand the Dental Hygiene Program Student Handbook. I have had the opportunity to ask questions and have those questions answered regarding the content within this handbook.

___ (initial) I agree to adhere to all the policies, expectations, and standards of conduct and appearance as set forth in this handbook for the Dental Hygiene Program at Salt Lake Community College.

___ (initial) I have also read the SLCC Student Code of Rights and Responsibilities and agree to adhere to the policies, expectations, and standards of conduct put set forth here as well.

___ (initial) I understand SLCC's drug screening, criminal background policy and that it is my responsibility to keep current on immunizations and CPR certification.

___ (initial) I understand the expectations of me as a student in the Dental Hygiene Program and agree to avoid unprofessional practice and unsafe practices. I am aware that any actions that constitute unprofessional practice and unsafe practice as defined in this handbook will constitute disciplinary action up to and including dismissal from the program.

___ (initial) Policies in the Handbook are subject to change due to unforeseen circumstances. Students will be provided a written notification, and a signed acknowledgment should there be a change in policy.

7.0 APPENDIX: FORMS

The forms in this appendix may be used during students' time in the program as needed.

FORM A: PREGNANCY/RADIATION SAFETY PROTECTION VERIFICATION B

FORM B: "INCOMPLETE" REQUEST FORM C

FORM C: PROGRAM DEFERMENT FORM..... E

FORM C-1: PROGRAM DEFERMENT ADDENDUM E

FORM D: PROGRAM DISMISSAL FORM. F

FORM E: PROGRAM LEAVE OF ABSENCE FORM G

FORM E-1: PROGRAM LEAVE OF ABSENCE ADDENDUM E

FORM F: PROGRAM PROBATION FORM F

FORM F-1: PROGRAM DEFERMENT ADDENDUM F

FORM G: PROGRAM WITHDRAWAL FORM G

FORM A: PREGNANCY/RADIATION SAFETY PROTECTION VERIFICATION

Dental Hygiene Program**Pregnancy/Radiation Safety Protection Verification**

I verify by my signature below that:

1. I have voluntarily notified Salt Lake Community College Dental Hygiene Program of my pregnancy.
2. I have been advised of protective measures as well as the risks associated with radiation exposure to the fetus. I have also been advised of and have read the appropriate federal guidelines regarding the declared pregnant radiation worker.
3. I have been advised that I should wear an additional radiation monitor for radiation dose to the fetus and I agree to wear such monitor at the level of the pelvis.
4. It has been explained to me that by wearing a 0.5mm lead equivalent protective apron, that the dosage to the abdomen/pelvis can be reduced by more than 88% at 75KvP. It has also been explained to me that a lead apron with 1.0 mm of lead equivalent should be worn when the beam is over 75kVp.
5. I have had the opportunity to discuss questions concerning radiation safety during my pregnancy with the Program Coordinator. Furthermore, I understand that should additional questions arise, I should consult my Program Coordinator.
6. I understand I have the option to withdraw this declaration at any time.

_____ I do understand the risks involved to the fetus and me during my pregnancy regarding pregnancy-related radiation safety. I elect to remain in the program and to adhere to the requirements stated. In doing so, I agree to indemnify and hold harmless Salt Lake Community College, its instructors, officers, officials, employees, trustees, and volunteers from and against any and all claims, suits, actions, or liabilities for injury or death to myself or to my fetus as a result of my participation in the Dental Hygiene Program, program activities, or program required clinical rotations.

_____ I do understand the risks involved to the fetus and me regarding pregnancy-related radiation safety. I elect to withdraw from the program. I also understand my readmission to the next program cohort is dependent upon space available.

FORM B: "INCOMPLETE" REQUEST FORM

**DENTAL HYGIENE PROGRAM
Course Incomplete Form**

Date: _____ Student: _____

Course: _____ Instructor: _____

An "Incomplete" in the above-named course is being granted to the student due to:

- Extenuating circumstances beyond the student's control
- Health issues, verified by a physician, prohibiting the student from completing the course in the designated time frame
- College issues that are beyond the student's control

The student understands that:

- An incomplete may only be granted during semesters 1, 2, or 3 of the Dental Hygiene program. Only (1) one incomplete may be granted during the program.
- The timeline for the resolution of the incomplete will be determined by the course instructor. If this timeline is not met, the student may be dismissed from the program.
- If a student is dismissed due to academic failure to complete the designated course, the interested student will need to re-apply to the Dental Hygiene Program according to the selective admissions process and will not be given special consideration for re-acceptance. A student will need to reapply to the program and meet all requirements or any changes/prerequisites to the program before they are admitted to the program as a new student.

Areas of Deficiencies:

Student Action Plan for Success:

Timeline and Circle Back:

My signature verifies that I have been made aware of my current status in the above-named dental hygiene course. In addition, it provides my intent to follow through with the established action plan for success as discussed with the clinic coordinator.

Revised 4/17/2023

FORM C: PROGRAM DEFERMENT FORM

School of Health Sciences
Program Deferment Form

Student name: _____ Student ID: _____
Program: _____ Deferment start date: _____
Deferment return date & semester/year: _____
Semester course(s) discontinued: _____

Reason for Deferment Request:

Conditions for a Deferment:

- Deferment is voluntary and must be initiated and requested by the student.
- Student is actively enrolled and participating in courses in the program.
- Student is “in good standing” with the program.
- Deferment will require a student complete the current semester enrolled with a grade assigned.
- Re-entry will occur in the next semester of the curricular sequence.
- Student must notify program three months prior to the re-entry start date for intent to return, in writing, email preferred.
- No extensions are granted for deferment.
- If the student does not notify the program with intent to re-enter or is unable to return within set period determined on this form, the student will be withdrawn from the program. A program withdrawal will require re-application for re-admission with re-entry starting at the first semester of the program.

By signing below, the student is requesting a deferment fully acknowledging and understanding the consequences with re-entry. College employees acknowledge receiving and reviewing the deferment request.

Student | Date: _____

Received by | Date: _____

Program Coordinator and Associate Dean will review deferment request within 10 business days of receipt.

☐ Approved ☐ Denied Program Coordinator | Date: _____

☐ Approved ☐ Denied Associate Dean | Date: _____

An appeal request of this decision may be made by the student to the Dean of Health Sciences.

FORM C-1: PROGRAM DEFERMENT ADDENDUM

Dental Hygiene Program
Program Deferral Addendum

Due to the specifics of the Dental Hygiene program only the following conditions will be considered for deferral.

Conditions for a Dental Hygiene Deferral:

- Deferral is voluntary and must be initiated and requested by the student.
- Student has been offered enrollment into the Dental Hygiene program.
- A one-time deferral of entry into the Dental Hygiene program is offered for one year only.
- Re-entry will occur in the following fall semester.
- Student must notify program three months prior to the re-entry start date for intent to return, in writing, email preferred.
- No extensions are granted for deferral.
- If the student does not notify the program with intent to re-enter or is unable to return within set period determined on this form, the offer of deferral will be withdrawn. An expired deferral will require re-application and acceptance for re-admission with re-entry starting at the first semester of the program.

FORM D: PROGRAM DISMISSAL FORM

School of Health Sciences
Program Dismissal Form

Student name: _____
Program: _____

Student ID: _____
Semester/Year: _____

Reason for dismissal:

Steps leading to dismissal:

Program student handbook reference:

Conditions of Program Dismissal:

- Dropping or withdrawal of a course after being selectively admitted to a program without an approved program withdrawal, deferment, or leave of absence will constitute student dismissal from a program.
- The Program, Division, and School has determined student dismissal from the program is required.
- Student may appeal the dismissal. Refer to SLCC and student handbook process.
- No grade will be given for courses registered for during the dismissal semester.
- Depending on the date of the dismissal, student may be responsible for tuition and fees for the current semester based on SLCC process. Dismissal does not release student from any financial obligations to the SLCC.
- Dismissal is immediate, upon close of the dismissal meeting. Student is directed to immediately leave the building. An escort may be provided.

By signing below, student acknowledges conditions of dismissal and attendance at a dismissal meeting. Student signature does not constitute agreement with the dismissal decision. SLCC employees acknowledge attendance at dismissal meeting.

Student | Date: _____

Program Coordinator | Date: _____

Associate Dean | Date: _____

FORM E: PROGRAM LEAVE OF ABSENCE FORM

School of Health Sciences
Program Leave of Absence Form

Student name: _____ Student ID: _____
Program: _____ Leave of absence start date: _____
Leave of absence return date & semester/year: _____
Semester course(s) discontinued: _____

Reason for Request: (Check all that apply)

☐ Military/Deployment ☐ Pregnancy/Complication/Childbirth/Newborn
☐ Illness/Injury ☐ Faith-Based Mission ☐ Other: _____

Comments:**Conditions for a Leave of Absence**

- Student has been selectively admitted and may be participating in courses.
- Circumstances prevent the student from successful completion of coursework which require the student to discontinue studies for a period.
- Student is “in good standing” with the program.
- No grade is earned for courses in a leave of absence semester.
- One leave of absence, per selective admission period and cohort, per student, may be considered.
- Depending on the date of the leave of absence, student may be responsible for tuition and fees for the current semester based on SLCC process. An approved leave of absence does not release student from any financial obligations to the SLCC. The student must decide whether to withdraw or drop from courses.
- A time frame agreed upon for return to the program.
- Student must notify program of intent to return three months prior to the re-entry start date; in writing, email preferred.
- If the student does not notify the program about intent to re-enter or is unable to return within set period determined on this form, the student must request an extension; in writing, email preferred, which will be attached to this form.

- The Program Coordinator and Associate Dean hold the prerogative to honor the request for an extension or not. A decision will be sent to the student within ten (10) business days of the request.
- If the student does not notify the program about re-entry within the time stated on this form, the student will be automatically withdrawn from the program. A withdrawal will require reapplication for readmissions starting again at the first semester of the program. By signing below the student is requesting a leave of absence, fully acknowledging, and understanding the consequences on grades, tuition/fees owed, and re-entry. College employees acknowledge receiving and reviewing the leave of absence request.

Student | Date: _____

Received by | Date: _____

Program Coordinator and Associate Dean will review leave of absence request within 10 business days of receipt.

☐ Approved ☐ Denied Program Coordinator | Date: _____

☐ Approved ☐ Denied Associate Dean | Date: _____

Rational for decision: _____

An appeal request of this decision may be made by the student to the Dean of Health Sciences.

EXTENSION REQUEST

Program Coordinator and Associate Dean will review the extension request (see attached) within 10 business days of receipt.

☐ Approved ☐ Denied Program Coordinator | Date: _____

☐ Approved ☐ Denied Associate Dean | Date: _____

Rational for decision: _____

If denial is the outcome for the leave of absence request or extension request, an appeal request of the decision may be made by the student to the Dean of Health Sciences.

FORM E-1: PROGRAM LEAVE OF ABSENCE ADDENDUM

Dental Hygiene Program**Program Leave of Absence Addendum**

The Dental Hygiene program will only consider a Leave of Absence for the following:

- Military/Deployment
- Significant illness/injury
- Significant complications with pregnancy/childbirth/newborn

FORM F: PROGRAM PROBATION FORM

School of Health Sciences
Program Probation Form

Student name: _____ Student ID: _____
Program: _____ Semester/Year: _____
Date of Probation _____

Reason for probation:

Steps leading to probation:

Program student handbook reference:

Conditions of Probation:

By signing below student acknowledges conditions of probation and attendance at a probation meeting. Student signature does not constitute agreement with the probation decision. SLCC employees acknowledge attendance at probation meeting.

Student | Date: _____

Program Coordinator | Date: _____

Associate Dean | Date: _____

FORM F-1: PROGRAM DEFERMENT ADDENDUM

DENTAL HYGIENE PROGRAM

Letter of Concern

Date: _____

Student: _____

Course: _____

Instructor: _____

Subsequent to either scheduled mid-term student conferences or clinical observations with faculty feedback, a letter of concern has been issued to the above recipient. The intent of this letter is to identify specific areas of deficiencies, to actively engage student participation, to develop a student success plan, to assist and promote positive learning outcomes. This does not imply failure however it informs the student they may be at risk. The objective is to provide a plan for remediation to promote student success.

This letter will be presented in conjunction with a School of Health Sciences Probation Form.

Areas of Deficiencies:**Student Action Plan for Success:****Timeline and Circle Back:**

My signature verifies that I have been made aware of my current status in the above-named dental hygiene course. In addition, it provides my intent to follow through with the established action plan for success as discussed with the clinic coordinator.

FORM G: PROGRAM WITHDRAWAL FORM

School of Health Sciences
Program Withdrawal FormStudent name: _____
Program: _____
Semester: _____Student ID: _____
Date of Withdrawal: _____
Course(s) to be withdrawn: _____**Reason for Request: (Check all that apply)**

- | | |
|---|--|
| ☐ Reason not provided | ☐ No longer interested in the program |
| ☐ Working too many hours | ☐ Pregnancy |
| ☐ Financial problems | ☐ Personal reasons |
| ☐ Academic load too heavy | ☐ Illness of self or family member |
| ☐ No longer interested in the profession | ☐ Other: _____ |

Conditions of program withdrawal:

- Student withdraws from the program on own volition.
- Withdrawal requires program/division approval; without approval, student will be granted a program dismissal.
- Program withdrawal may require course withdrawal or course drop if requested within a semester.
- If a program withdrawal is requested within a semester, course withdrawal can only be honored if a student is passing at the time of the withdrawal request.
- No grade will be given for courses registered for during the withdrawal semester.
- Depending on the date of the withdrawal, student may be responsible for tuition and fees for the current semester based on SLCC process. Withdrawal does not release student from any financial obligations to the SLCC. The student must follow College protocol for a withdrawal or drop.
- Once this program withdrawal form is signed, student may not return to the program other than by reapplying through the Health Sciences admissions process.

By signing below, I acknowledge I understand the consequences of withdrawal on my grades, eligibility to reapply, my date of graduation, and my eligibility for a tuition refund (if any).
