

# Physical Therapist Assistant

The science of healing. The art of compassion.

A Physical Therapist Assistant (PTA) is a healthcare provider working with individuals and their families under the supervision of a Physical Therapist (PT) in providing client care by applying a variety of therapy treatments in different healthcare settings. Treatment techniques include therapeutic exercises, heat, cold, electrotherapy, hydrotherapy, traction and massage. The PTA will be involved in modification of treatment programs, client/family education and discharge planning under the direction of a PT. Healthcare settings where a PTA may work include hospitals, extended care facilities, rehabilitation centers, outpatient facilities, sports medicine clinics, work hardening programs, schools and homes.

## WHY SLCC?

In addition to regular studies, students participate in the on-site SLCC “pro-bono” clinic, providing therapy to need-based individuals and others from the community.

## THE CURRICULUM

The PTA program provides both general and technical education. The program consists of four semesters of PTA coursework in addition to the prerequisite courses.

Upon successful completion, graduates are awarded an Associate of Applied Science (AAS) degree. Graduates are able to sit for the national examination for Physical Therapist Assistants, which is required for licensure in Utah.

## ADDITIONAL INFORMATION

- One cohort of 24 students is admitted every fall semester.
- Accepted students must take the PTA courses in the order outlined in the curriculum. To remain in the program, students must complete the PTA courses with a C (77%) grade or better in each required course.
- All PTA courses are taught during the day.
- Students may come in contact with blood-borne pathogens and infectious diseases and all students in the PTA program must follow proper OSHA procedures and practice universal precautions.
- Prior to the first day of class you will be invited to join an orientation Canvas course that is required before starting classes.
- Accepted students must complete program required immunizations and certifications before clinical placements.
- Students will be responsible to provide their own transportation to clinical sites.
